

#### **PREFACE**

The game of LinguiSHTIK® is played competitively at the local, state, and national levels. The object of LinguiSHTIK is to make a four to ten letter word using cubes from the game mat. The word must satisfy the Demands made in the course of play and must be used in a sentence type, classified by pattern, structure, or purpose, that is designated by the first player. The rules by which the game is played are contained in the Academic Games Leagues of America, Inc. ("AGLOA") Tournament Rules, that make this handbook/judges manual the game's official judging reference. This handbook/manual includes all changes made in the 2025-2026 LinguiSHTIK Tournament Rules.

This handbook/manual has been written to provide coaches, players, those who judge LinguiSHTIK, and those who would like to judge LinguiSHTIK with a handy reference. This handbook/manual is intended to codify those rulings that have traditionally been made in the game and to illuminate some others that may arise in the future. This handbook/manual is organized so that it takes the reader through the game in the same order in which the students play. In addition, there are sections on judging, technical rulings related to the game and finally a judge's self-test.

Reference in this handbook/manual to a specific tournament rule is denoted as (LT). The Tournament Rules are broken down by division based on grade level: Elementary Division (4th - 6th grade), Middle Division (7th - 8th grade) Junior Division (9<sup>th</sup> - 10<sup>th</sup> grade), and Senior Division (11<sup>th</sup> -12th grade). The LinguiSHTIK Tournament Rules are updated and made available yearly (usually August 1st). This handbook/manual denotes where the rules make distinctions between the divisions as follows:

- Is not allowed in Elementary Division
- Is not allowed in Elementary or Middle Divisions
- Is not allowed in Elementary, Middle, or Junior Divisions

The authors are especially grateful to the Board of Directors of AGLOA who endorsed our efforts in the development of this handbook/manual. The authors also wish to acknowledge Brother Neal Golden who permitted us to borrow liberally from the rulings already established in his *Manual for* Equations and On-Sets Officials. In addition, the authors also acknowledge the significant contributions that Sue Stephenson, Jean Skomra, Kathryn Boswell, and Steve Wright made in preparing previous judging manuals. Finally, the authors wish to acknowledge each of the judges, teachers, and students whose insight and countless questions led to many of the rulings reiterated in this handbook/manual. The authors alone, however, take responsibility for any errors contained herein.

This 2025-2026 Edition of this handbook/manual replaces the earlier Editions and should be the one used for judging in local and national tournaments in conjunction with the 2025-2026 LinguiSHTIK Tournament Rules. Each section has been numbered separately with Roman numerals, and all pages are numbered consecutively so that sections can be found easily using the Table of Contents. An index at the end of the handbook/manual will assist readers in finding specific topics.

Copyright © 1998 by Kathryn Boswell, Ellen Bredeweg, Steven A. Wright and Academic Games Leagues of America, Inc. Most recently revised in 2019, 2022, 2023, 2024, and 2025 by Ellen Bredeweg and Vivian Lin.

This 2025-26 Edition of the LinguiSHTIK Handbook and Judges Manual has been correlated to specific rules of grammar. The page numbers appearing next to a topic in this handbook/manual refer to the rules of grammar on that topic as set forth in the official grammar reference for LinguiSHTIK Tournament play: *Elements of Language*, 6th Course published by Holt Rinehart Winston. Changes are marked by highlighted boxes, except that topics that have been moved from one division to another are marked only by the number of asterisks denoting the applicable division(s). As significant changes were made in summer 2024 and 2025 in the distribution of topics across divisions, coaches should refer to the most recent Order of Play sheets for each division.

Official Tournament Rules (for the current year)

## **SECTION I: THE GAME OF LinguiSHTIK**

The object of the game of LinguiSHTIK® is to make a 4-10 letter word using cubes from the game mat. The word must satisfy the demands made in the course of play and must be used in a sentence type, classified by pattern, structure, or purpose, that is designated by the first player. (LT 2).

#### A. Starting a Game

Students are allowed the following materials when playing the game: (1) the LinguiSHTIK Scoring Chart, (2) the LinguiSHTIK Order-of-Play sheet including the LinguiSHTIK General Demand sheet, (3) a supply of blank List of Demands forms, (4) the LinguiSHTIK Game Mat, and (5) all twenty-three LinguiSHTIK cubes. (LT 3). (The List of Demands Form, Order-of-Play sheets and Scoring Charts for each division are referenced in the Table of Contents (page i -8) and are also available online at agloa.org).

Absolutely forbidden are grammar books, dictionaries, the LinguiSHTIK Game Manual, the LinguiSHTIK Rules and Dictionary of Terms, or this handbook/manual. All cell phones, smart watches, and other electronic devices must be turned off and put away before a round begins. Players may bring to the table only BLANK paper (lined or unlined) and writing implements (pens or pencils). BEFORE the round begins, players should check the papers of their opponents to make sure that all papers are BLANK. Once a round begins, any player may write anything on his or her own paper. When a player submits a sentence to opponents for evaluation, the player must circle the submitted sentence and underline the word that he or she believes satisfies the Demands for that shake so that the opponents know which word and sentence to evaluate. If a player fails to circle a sentence or underline a word when presenting, his or her opponents should ask that the sentence be circled and that the word be underlined. There is NO penalty for failing to circle a sentence or to underline a word. (LT 21).

To determine who initiates the game, <u>each player rolls a red cube</u>. The player who rolls a letter closest to the beginning of the alphabet becomes Player One for the first shake. Players tied for Player One will roll again until the tie is broken. To start a new shake, proceed in a clockwise manner to Player One's left. Thus, Player Two in the first shake becomes Player One in the second shake. (LT 5).

## B. The First Three Plays (LT 11)

#### 1. The Sentence Designation -- Player One

Player One must state the Sentence Designation -- the type of sentence in which the word to be formed must be written. Player One has one minute within which to make this designation, and then each subsequent player has one minute within which to make a Demand or move a cube from resources. Player One does not move a cube when making the sentence designation.

<sup>&</sup>lt;sup>®</sup>LinguiSHTIK is copyrighted by Allen's Academic Games.

# 2. The Type Demand -- Player Two

Player Two must state the Type Demand -- the type of word to be formed. This is always the first Demand made in a game. In making this -- and every other Demand -- a player selects a green or black cube and places it on the section of the mat designated as Demands and <u>simultaneously</u> states his or her Demand.

## 3. The Function Demand -- The Third Move

Player Three must state the Function Demand -- how the word to be formed will function in the sentence. In a two-player game, this move is made by Player One.

When the start of the game does not proceed in the proper order, then one of the players **must** declare **Illegal Procedure** and see that the proper procedure is followed. A player who does not make the proper Demand in the right order must retract his or her Demand and make a proper one. **NO PENALTY IS INVOLVED** <u>UNLESS</u> the player fails to make the proper Demand in the one-minute time limit allowed for making a Demand. (**LT 13**)

**PENALTY:** If Player 1, 2, or 3 has not made the proper Demand in the 1-minute time allowed for making a Demand, he/she receives a one-point (-1) penalty and is instructed by the judge to \*"move." [\*In the first three moves of the game, a player who does not make his/her move is instructed to "move" by the judge so that those first three moves (the choice of sentence pattern, structure, or purpose; the Type Demand, and the Function Demand) are made correctly.]

## C. The Remaining Moves

After the Function Demand, each player, on his turn, and within his one-minute time limit, can either (1) move a cube to letters; (2) make a Demand, (3) make a Challenge, or (4) PASS. If all players choose to PASS, then Forceout is declared. (LT 12)

## 1. Move a Cube to Letters

A player may play a cube to the *LETTERS* Section of the mat with the intention that the letter played <u>may</u> be used to form the designated word at a later time. There is no set order for placing letters on this section of the mat. When a cube touches the mat in *LETTERS*, it is considered played and may not be retracted.

## 2. Make a Demand

A player may not move a cube to letters and also make a Demand. A player may do one or the other, not both. After the Function Demand, a player on his turn, instead of moving a cube to letters, may make a Demand -- either a General Demand or an additional Function Demand. (LT 14)

The order of events for making a Demand should be as follows: (1) a player selects a green or black cube and places it on the section of the mat designated as Demands and simultaneously states his or her Demand, then (2) writes the Demand on the *List of Demands Form* in a timely manner. The Demand is considered to be made when the cube

touches the mat since the move of a cube is completed when it touches the mat. (SEE LT 9, LT 10, LT 15, LT 16, and LT 17 for explanations of Demands.)

Each player must write his or her Demand on the *List of Demands Form* and on his pr her individual notebook paper. A player making a Demand is highly encouraged to check that all of the players have written down the correct Demand, particularly when it involves a letter.

When the cube touches the mat, it is assumed to be played and may not be retracted; therefore, a player may not put the cube down in the Demands column and slide it over into the Letters section of the mat. A black or green cube in the Demands column of the mat may not be used as one of the letters in the word to be formed. If a player has stated or written a Demand but not yet placed a cube on the mat in the Demands section, he or she may withdraw the Demand. There is no penalty unless the play is not completed during the player's time.

The List of Demands Form is a primary resource used by judges when answering questions about each shake. If all players agree that a Demand was in force for the shake, even if not written on the List of Demands Form, then the Demand is in force. If there is not unanimous agreement, however, then what is written on the List of Demands Form becomes the authority.

If a Challenge is made after the cube touches the mat, the player who made the Demand will complete his or her move by writing the Demand on the *List of Demands Form*. If a player states the Demand before touching the cube to the mat, and another player challenges, that Challenge is valid; however, it will NOT include the Demand since the cube has not touched the mat.

If a player has placed a cube in the Demands section within the time limit, a (-1) penalty cannot be given for the stated Demand not being written on the *List of Demands Form* before the 10-second countdown is completed, so long as the Demand is written in a timely manner. (LT 8).

NOTE: For various situations that may occur when a Demand is made, players should refer to the Technical Rulings, Section A in this manual (pages 59-63.)

## 3. <u>Make a Challenge</u>

A player can challenge anytime, as long as he or she is not the last mover.

#### a. How to Challenge

A challenge block is to be placed equidistance from all players at the table. A player challenges by **picking up** the challenge block and <u>simultaneously</u> stating his or her Challenge. A player who picks up the challenge block and makes an invalid Challenge or says nothing is penalized one point and the Challenge is set aside. Examples of invalid challenges are (a) challenging yourself (you were the last Mover) and (b) challenging Now when fewer than three cubes are in Letters. **If a valid Challenge has been stated, it cannot be retracted.** (LT 18).

If the challenger does not pick up the challenge block, there is no Challenge. If two players challenge at nearly the same time, the player who picks up the challenge block first is the challenger. If two players pick up the challenge block at exactly the same time in the opinion of the third player, they are both challengers.

A player may never challenge if he or she made the last move. Either of the two players, other than the last mover, may challenge. It does not need to be a player's move for him or her to challenge. (LT 18).

NOTE: See Technical Rulings for sample Challenge situations and rulings (XVII, Section B, pages 63-65).

#### b. Types of Challenges (LT 19)

There are two Challenges that can be called. These are **Challenge Now** and **Challenge Impossible**.

CHALLENGE NOW: Using one more cube from Resources (if needed\*), a player will write a solution. The one more cube may be a letter that he may use in the word, or it may be a black or green cube that may be used to make a Demand. If a player's one more cube is used to make a Demand, he must write the Demand as well as the solution within the time limit. \*If all the cubes needed to make the word are already in the Letters section of the mat, the player does not need to use one more cube from Resources.

**NOTE:** If a player makes a Challenge Now statement with fewer than three cubes in the Letters section of the mat, that player receives a -1 penalty, and loses his or her turn, and the Challenge is invalid.

**CHALLENGE IMPOSSIBLE**: It is impossible, with \*only the legal Demands currently in force, to make a word that fits all of the legal Demands with the letters available in letters and resources and also to write the designated sentence. \*An additional Demand may <u>not</u> be made if Challenge Impossible is called.

**NOTE:** Although the purpose of the game is to find words and write grammatically correct sentences, in some instances it may be necessary to call Challenge Impossible before all three players have made their first moves.

# c. <u>Procedures for Challenging</u> (LT 20)

## 1) <u>CHALLENGE NOW</u>

The **CHALLENGER** must write a solution within three minutes. In writing the solution, the player may use one cube from Resources (if needed). The one more cube may be used as either a letter in the word to be formed, or it may be a green or black cube used to make an additional Demand. This additional Demand must be written on the paper with the solution.

The **MOVER** and **THIRD PARTY** are assumed to be solvers if they write a solution within the three minutes. A player may choose to be NEUTRAL. NEUTRAL means that the player is not going to present a solution. [The 1-minute statement of NEUTRAL has been removed; a player does not need to state the intent to be Neutral.]

\*If a player calls CHALLENGE NOW with fewer than three cubes in the LETTERS section of the mat, that player receives a -1 penalty and loses his or her turn, and the Challenge is invalid.

**Note**: There is no requirement for players to use the terminology of "Agreeing or Siding with" the Challenger, nor would there be any penalty if they did use that terminology.

## 2) <u>CHALLENGE IMPOSSIBLE</u>

The CHALLENGER may not write a solution.

The **MOVER** <u>must</u> write a solution within three minutes. In writing a solution, the player may use as many letters as needed from letters and/or resources, but the player may not make any further Demands.

The **THIRD PARTY** is assumed to be a solver if he or she writes a solution within the three minutes. He or she may also choose to be NEUTRAL and not present a solution.

Note: Under special circumstances, Player One may call Challenge Impossible. See **LT25** in the Official Tournament Rules.

# 4. PASS and FORCEOUT (LT24)

## a. PASS Procedure

- 1) After the first three moves are made (Player One, Player Two, Player Three) a player may choose to say PASS; that means that he or she will not play a cube to the mat.
  - a. Usually this will occur near the end of a shake when the player feels that there is not a safe move, and any move will make it possible for another player to call Challenge Now.
  - b. A player may only PASS once in a shake and must initial the Demands Form to indicate that the PASS has been used.
  - c. Once all players have called "PASS" then **FORCEOUT** is declared. \*Note: If Player 1 and Player 2 have called PASS and Player 3 places a cube on the mat, when Player 3 does call PASS a FORCEOUT is declared.
- 2) It should be noted that PASS is considered a MOVE, so after a player calls "PASS," a subsequent player still has the option to place a cube, make a Demand, or make a Challenge. In a three-player shake, the Third Player still has those options even if both other players have said "PASS."
- 3) Players need to be aware that calling PASS too early in a shake may result in the necessity of putting a cube on the mat later in the game, that might set up another player to challenge. If one or two players pass but the next decides to move, that player opens himself or herself to a Now or Impossible Challenge.

## b. FORCEOUT Procedure

- 1) If each player passes, then **FORCEOUT** is called. (\*See note above under **PASS** procedure, Section 1.c)
- 2) **FORCEOUT** means that players have three minutes to write solutions using <u>two</u> more cubes from Resources. Neither of these cubes may be used as a Demand. Correct solutions would score 4 points. Players with incorrect or no solutions would score 2 points.

**NOTE**: If a player's time expires before he or she either (1) moves a cube to letters, (2) makes a Demand, (3) makes a Challenge, or (4) passes, then the player suffers a one-point penalty and loses his or her turn. (LT 13).

NOTE: See Technical Rulings for sample PASS and FORCEOUT situations and rulings (XVII, Section C, pages 65-66).

in 2025

# D. Illegal Procedure and Duplicate Demands (LT 13)

Players should NOT use the challenge block to charge Illegal Procedure or Duplicate Demand.

➤ Illegal Procedure. Any action that violates a procedural rule. A player charging Illegal Procedure must clearly specify immediately the exact nature of the Illegal Procedure.

Examples of Illegal Procedure include but are not limited to the following:

- moving out of turn or moving a cube from one section of the playing mat to another,
- making any demand not recognized as acceptable in the LinguiSHTIK rules, Example: making a usage demand that is not applicable to the part of speech called by Player Two.
- a. If the move is an Illegal Procedure,
  - The Mover must return any illegally moved cube to its previous position (usually Resources) and make a legal move.
  - The Mover must be given at least 10 seconds to make this correction, unless the original move was made after the ten-second countdown, in which case the time limit rule is enforced.
  - If the player has not corrected the action within the time limit, then the player gets a -1 penalty, the action is set aside, and the player loses his turn.
- **b.** If the move is *not* an Illegal Procedure, the cube stands as played.
- **c.** If the Illegal Procedure is not charged or corrected before another player makes a legal move, it stands as completed. A player could correctly call Challenge Impossible if a solution cannot be written that fulfills the rules of the game.
- ➤ **Duplicate Demand.** Any demand that duplicates a General Demand, items A-G, or that results in more phrases or clauses demanded than are allowed in that division.

Examples of Duplicate Demands are limited to the following: color wild, must contain, must not contain, letter transfer, number of letters, double vowel, double consonant, demanding more phrases or clauses than the number allowed in that division.

- a. If the move is a Duplicate Demand,
  - The Mover gets a -1 penalty.
  - The Mover must return any illegally moved cube to its previous position (usually Resources) and make a legal move.
  - The Mover must be given at least 10 seconds to make this correction, unless the original move was made after the ten-second countdown, in which case the time limit rule is enforced.
  - If the player has not corrected the action within the time limit, the action is set aside, and the player loses his turn.
- **b.** If the move is *not* a Duplicate Demand, the cube stands as played.
- **c.** If the Duplicate Demand is not charged or corrected before another player makes a legal move, the second demand is not in effect.

#### **Sample situation A:**

Player One: plays a cube

Player Two: makes a demand "The word must not contain any vowels." [That demand is not recognized as an acceptable demand in LinguiSHTIK]

At this point, either Player One or Player Three charges Illegal Procedure.

*RESULT:* Player Two has the rest of his time (or 10 seconds – see above) to return the demand cube to Resources and make a legal move. If Player Two does not, the player gets a -1 penalty, the action is set aside, and he loses his turn.

## **Sample situation B:**

Player One: makes a demand "Yellow is wild." Player Two: makes a demand "Pink is wild."

Player Three puts a cube in Letters.

Player Three has insulated the Duplicate Demand. When a solution is written for this shake, only yellow cubes can be used as wild cubes. The Duplicate Demand that pink is wild is not in effect. If Player Two writes a sentence that requires both yellow and pink to be wild, his solution is incorrect. There is no -1 penalty for Player Two since the Duplicate Demand was not charged when it was played.

NOTE: For various additional situations that may occur when Illegal Procedure or Duplicate Demand is charged, players should refer to the Technical Rulings, Section A of this manual (pages 59-63).

## **SECTION II: SENTENCE DESIGNATION (LT 6)**

To start a shake, Player One rolls the cubes, orders them in a group called Resources, and designates either a (i) pattern, (ii) structure or (iii) purpose. In LinguiSHTIK, pattern and purpose are governed by the independent clause in the sentence. Therefore, a dependent clause functioning as a modifier does not affect the pattern or purpose of a sentence.

## A. <u>SENTENCE PATTERNS</u> (LT 6)

There are twelve sentence patterns. A player designates one of the patterns. A player may use a pronoun in any situation calling for a noun unless a noun is required to meet the Type Demand. Dependent clauses not functioning as nouns as well as modifiers have no effect on the designated pattern. The pattern will determine the order that the words will appear in the sentence.

## 1. S-V (Subject –Verb)

#538

This is a sentence or independent clause that has only a subject and a verb and may have modifiers.

**Examples:** Birds sing.

The boy walked down the street.
Charles Beebe was born in Brooklyn.

While it was raining, I slept.

## 2. S-V-DO (Subject –Verb – Direct Object)

#539

This is a sentence or an independent clause that contains only a subject, verb, direct object and may have modifiers.

**Examples:** Because we were hungry, my mother baked cookies.

Beetles have four wings.

I usually leave the hardest problems until last.

#### 3. S-LV-PN (Subject – Linking Verb – Predicate Noun)

#543

This is a sentence or an independent clause that contains only a noun, linking verb, predicate nominative and may have modifiers.

**Examples:** The secretary should be a boy.

Asia is a continent of extremes.

Because he was a good student, Winston Churchill became a leader.

## 4. S-LV-PA (Subject – Linking Verb – Predicate Adjective)

#544

This is a sentence or an independent clause that contains only a subject, a linking verb, predicate adjective and may have modifiers

Examples: The honey was very sweet.

Her pies taste delicious.

Because he received the award, Bob could not be happier.

<sup>\*</sup>Only for middle, junior, or senior divisions II - 8 LinguiSHTIK Judges Manual - 2025-26 Edition

<sup>\*\*</sup>Only for junior or senior divisions

## 5. S-V-IO-DO (Subject – Verb – Indirect Object – Direct Object)

#540

This is a sentence or an independent clause that contains only a subject, verb, indirect object, direct object and may have modifiers.

**Examples:** Because it was her birthday, the boy gave his mother a rose.

Uncle Winston wished us a safe trip. Ms. Pratt dropped Willis a hint.

6. INVERTED\* #531

A sentence is inverted if the verb, or part of it, precedes the subject. The subject appears after the predicate or between the parts of the predicate. The sentence may begin with *here* or *there*. For the purposes of this game, the **interrogative sentence** shall **not** be considered inverted.

**Examples:** Pattern: Here or There + <u>verb</u> + *subject*.

Here <u>comes</u> the **bus**. There <u>goes</u> the **boat**.

Pattern: adverb or phrase + verb + *subject*.

Down the hill rolled the children.

Away trotted the dogs.

Pattern: direct quote + verb + *subject*.

"Strike three," yelled the umpire.

"I am so sorry," said the girl.

Pattern: auxiliary + *subject* + main verb.

Rarely has my friend played basketball.

Only then did the **student** understand the problem.

# 7. S-V-DO-OC (noun)\*\* (Subject-Verb-Direct Object-Objective Complement) {noun} #541

This is a sentence or an independent clause that contains only a subject, verb, direct object, noun objective complement and may have modifiers

**Examples:** Because we lived there, we called Mayfield our home.

The judges selected Alice Adams Miss Ohio. The sponsor appointed the girl captain.

# 8. S-V-DO-OC (adj.)\*\* (Subject-Verb-Direct Object-Objective Complement) {adj.} #541

This is a sentence or an independent clause that contains only a subject, verb, direct object, adjective objective complement and may have modifiers.

**Examples:** Our neighbor painted his house green.

Because the dog was hungry, he licked the dish clean.

Those people thought the clown funny.

**NOTE:** Retained objects can only be found in sentences written in the passive voice. Therefore, for sentence patterns #9-12, the verb must be in the passive voice. A verb in the active voice often has an

<sup>\*</sup>Only for middle, junior, or senior divisions II - 9 LinguiSHTIK Judges Manual - 2025-26 Edition \*\*Only for junior or senior divisions \*\*\*Only for senior division

indirect object as well as a direct object. When such a verb is put into the passive voice, either object can become the subject. The other object then serves as a complement called a retained object.

#### 9. S-V-RETAINED DO\*\*\*

#705

This is a sentence in which the verb is in the passive voice and a retained direct object remains in the object position.

**Examples:** Each new employee was given a tour of the factory.

They were given <u>flowers</u> by the committee.

The teacher was handed the apple.

#### **10. S – V – RETAINED IO\*\*\***

#705

This is a sentence in which the verb is in the passive voice and a retained indirect object remains in the object position.

**Examples:** A tour of the plant is given each new <u>employee</u> by the boss.

The kiss was given the <u>child</u> by his proud mother. An apple was given the <u>teacher</u> by her students.

#### 11. S-V-RETAINED OC (noun)\*\*\*

#705

This is a sentence in which the verb is in the passive voice and a retained noun objective complement remains in the object position.

**Examples:** The objects were called <u>flowers</u>.

Sam was named captain by his team.

Marvin was elected <u>president</u> by his friends. He was considered a <u>genius</u> by his mother.

## 12. S-V-RETAINED OC (adj.) \*\*\*

This is a sentence in which the verb is in the passive voice and a retained adjective objective complement remains in the object position. #705

Examples: The objects were colored green by the group.

Mary was declared <u>pretty</u> by the judges. She was called genius by her friends.

Bob, thinking of saying, "The fish was called <u>finny</u> by the boys," laughed.

**Note**: in the last sentence, the word <u>finny</u> is in a participial phrase, a gerund phrase, an adverb phrase, a direct quote, and a noun clause, In the Senior Division, functions could also have been called for any of the phrases and clauses.

<sup>\*</sup>Only for middle, junior, or senior divisions II - 10 LinguiSHTIK Judges Manual - 2025-26 Edition \*\*\*Only for junior or senior divisions \*\*\*Only for senior division

#### JUDGES' NOTES ON SENTENCE PATTERNS

**1. NOTE**: If Player One designates a pattern and subsequently a **compound sentence** is written, the word to be formed must be in the designated pattern.

Example: S-V Noun Subject

The girl ran and the teacher baked cookies.

(**Correct**: Since "girl" is in the S-V portion of the compound sentence), then all the Demands are met. Since "the teacher baked cookies" is an S-V-DO pattern, a player could not form the word "teacher."

**2. NOTE**: If Player One designates a pattern and subsequently a **complex sentence** is written, the word to be formed may be in <u>either</u> an independent or dependent clause. Although the sentence must meet the designated pattern, the word to be formed does not have to be in the designated pattern.

Examples: S-LV-PN

Noun

Direct Object

The woman who teaches the class is a nurse.

S-V

Noun

**Direct Object** 

After baking cookies, mother drove to the store.

- **3. NOTE**: If Player One demands a pattern and subsequently a **compound complex sentence** is written, the word to be formed may be in either
  - (i) the designated pattern OR
  - (ii) a dependent clause attached to the designated pattern.

**Examples:** S-V

Noun Subject

in an Adverb clause

While the pilot was waiting for the airplane, the woman paced, and the girl played cards.

(**Correct** - Since the dependent clause is attached to an independent clause that is the designated pattern, the word to be formed can be in the dependent clause.)

S-V

Noun

Subject

in an Adverb clause

The woman paced and the girl played cards while the pilot was waiting for the airplane.

(**Wrong** - In this example, since the dependent clause is attached to an independent clause that is <u>not</u> the designated pattern, then the word to be formed cannot be in the dependent clause.)

<sup>\*</sup>Only for middle, junior, or senior divisions II - 11 LinguiSHTIK Judges Manual - 2025-26 Edition \*\*Only for junior or senior divisions \*\*\*Only for senior division

# B. <u>SENTENCE STRUCTURES</u> (LT 6)

1. SIMPLE #588

A sentence that contains a single sentence pattern is a simple sentence. The sentence must contain only one main subject and one main predicate although these elements may be compound. A direct or indirect quote that contains a subject and verb is a dependent noun clause; therefore, its addition to a sentence will create either a complex or compound-complex sentence. A simple sentence is an independent clause.

**Examples**: My father left yesterday.

We visited two museums.

Winston and Maurice traveled many miles and saw many things.

**NOTE:** Any dependent clause changes a simple sentence into a complex sentence.

**Example**: My father, who is sleeping, left yesterday.

(The addition of the adjective clause "who is sleeping" makes the sentence

a complex sentence.)

2. COMPOUND #588

A sentence that contains two or more independent clauses, but NO dependent clause is a compound sentence. The clauses may be connected by a coordinating conjunction, conjunctive adverb, or a semicolon.

**Examples**: The war is over; the guns are silent. (semicolon)

The story sounds false, but I know it is true. (coordinating conjunction)

Byron is on a diet; nevertheless, he eats dessert. (conjunctive adverb)

Note: For the purposes of LinguiSHTIK, a comma is not required in a compound sentence.

3. COMPLEX #589

A sentence that contains only one independent clause and one or more dependent clauses is a complex sentence.

**Examples:** The train stalled because the switches were frozen.

We heard that you were going to the farm.

He said, "I will not eat meat."

**NOTE**: If a noun clause functions as a noun within an independent clause a complex sentence is formed.

**Example**: Whoever talks will be given an extra assignment. ("Whoever talks" is a noun clause that functions as the subject of this sentence. The noun clause makes the sentence a complex sentence.)

#### 4. COMPOUND-COMPLEX

#590

A sentence that contains at least two independent clauses and one or more dependent clauses is a compound-complex sentence.

**Examples:** When Turk caught the ball, he ran for a touchdown, and the crowd went wild.

After the storm ended, we decided to go home, but the snow piled into great drifts that blocked the road.

He stood at the podium, and he said, "The only thing we have to fear is fear itself."

## JUDGES' NOTE ON SPILLOVER CONFUSION:

There is much confusion about spillover confusion, referenced in LT 7. Spillover confusion applies only when player One designates a <u>structure</u>. Since structures have a defined number of independent and dependent clauses, adding additional clauses will turn one structure into another, thus the added clause causes the sentence structure to "spill over" into another structure. For example, adding a dependent clause to a simple sentence makes it no longer a simple sentence, but a complex sentence. In short, spillover confusion is a term used to remind people that when player One designates a <u>structure</u>, one must proceed with care in adding additional clauses.

# C. <u>SENTENCE PURPOSES</u> (LT 6)

1. DECLARATIVE #591

A sentence that makes a statement is declarative. A sentence that states a fact or opinion is declarative.

**Examples:** Walt Disney loved farm life, and he sketched animals constantly.

During his school years, Disney and a friend enjoyed acting.

He later attended an art institute where he learned to draw cartoons.

## 2. INTERROGATIVE #592

A sentence that asks a question is interrogative. An interrogative sentence always ends with a question mark.

#### Forming interrogative sentences

Use auxiliary verbs to begin them: **Are** *you* sleepy?

**Have** they finished their project yet?

Use interrogative pronouns to begin them: What **does** the boss think about the proposal?

Who is coming to the play?

Use adverbs to begin them: When will we arrive?

Where did you buy that camera?

\*Only for middle, junior, or senior divisions II - 13 LinguiSHTIK Judges Manual - 2025-26 Edition \*\*Only for junior or senior divisions \*\*\*Only for senior division

**NOTE:** A declarative sentence cannot be made interrogative simply by adding a question mark. Such writing is sometimes found in dialogue or informal usage, but it is not considered formal writing and is not acceptable in this game.

3. IMPERATIVE #591

A sentence that gives a command or makes a request is imperative. An imperative sentence usually ends with a period. A strong command may end with an exclamation point.

**Note**: It is recommended that to prevent confusion players do not write imperative sentences with exclamation points; however, there is no penalty for doing so.

**Examples:** Clean your room before you go out with your friends.

Consider the life of the famed animator, Walt Disney.

4. EXCLAMATORY #592

A sentence that expresses strong feeling is exclamatory.

Examples: I missed the bus!

If I do not get home in five minutes, I will be in big trouble!

**NOTE:** Rather than trying to determine whether a sentence demonstrates strong emotion, accept as exclamatory any **non-imperative** sentence that a player writes as long as it ends with an exclamation mark. An imperative sentence will NOT be judged exclamatory.<sup>1</sup>

**NOTE**: If Player One designates a <u>purpose</u> and writes a compound, complex or compound-complex sentence, the purpose has been met if any <u>independent clause</u> meets the purpose. The word to be formed **does not** have to be in the independent clause that meets the designated purpose.

#### **SECTION III: NOUNS & PRONOUNS**

#### A. TYPE DEMAND

**NOUN** - A word that names a person, place, thing, idea or feeling. **PRONOUN\*** - A word that takes the place of a noun.

**NOTE**: There are very few words that can function as both nouns and pronouns; however, they do exist. For example, numeric pronouns -- that are indefinite pronouns -- such as three, four, etc. can also be nouns. The determining factor in most cases is whether there is an article (e.g., "the") in front of the word.

Examples: Four ran to the store. (Four is an indefinite pronoun).

The four ran to the store. (Four is a noun functioning as a subject).

**NOTE**: There are pronouns that take articles, an example of which is *other*.

#### **B.** FUNCTION DEMANDS

1. SUBJECT - A noun or pronoun about which something is being said in a sentence or clause. #531

**Examples:** The pilot flew the airplane.

The girl ran to the store.

**NOTE**: In sentences other than simple sentences, there may be more than one subject. As long as the other Demands are met, there is no restriction on which subject is formed.

Example: S-V

Noun Subject

The painter laughed because the joke was funny.

(Since both "painter" and "joke" function as subjects, either word could be formed. However, if the Demand were made that the word also had to be in an adverb clause, then only the word "joke" would meet the Demands.)

2. DIRECT OBJECT - A noun or pronoun that receives the action of a transitive verb, active voice verb or verbal. (Regarding passive voice verbs - see Retained Objects.) #539, 1095

**Examples:** Mother baked cookies.

I called them.

Mary, the girl who drew the <u>picture</u>, is ten years old. After driving the <u>truck</u>, I gave my father the <u>keys</u>.

3. INDIRECT OBJECT - A noun or pronoun that follows a transitive verb, active voice verb or verbal and precedes a direct object. It usually tells to whom/what or for whom/what the action of the verb is done. #540, 1099

**Examples:** The boy gave the teacher an apple.

I gave my horse a bath.

4. **PREDICATE NOUN (NOMINATIVE)** - A noun or pronoun that follows any form of a linking verb and renames or identifies the subject. #543, 1104

**Examples**: The lady is a <u>nurse</u>.

The man is the <u>mayor</u> of my city. Benjamin Franklin was an <u>inventor</u>. That person is <u>someone</u> in my family.

**OBJECT OF THE PREPOSITION** - A noun or pronoun at the end of a prepositional phrase. #517

**Examples:** I read a book about dinosaurs.

I walked in the <u>grass</u>. I talked to <u>myself</u>.

NOTE: For more detail see PHRASES: Prepositional phrase, Section XI – p. 48.

**6. APPOSITIVE** - A noun or pronoun placed beside another noun or pronoun to identify or explain it. #567-568

An appositive usually follows the word it identifies or describes. For emphasis, however, an appositive may come at the beginning of a sentence.

**Examples:** Nancy, my sister, lives in New Jersey.

My adviser, Mrs. Smith is always there after school.

**NOTE**: An appositive that has a possessive adjective or an article in front of it is considered a <u>one-word appositive</u> and **not** in an appositive phrase (i.e., my sister, the boy). When additional modification is present the appositive is in an appositive phrase. For a definition and examples of an appositive phrase, see XI: PHRASES, #1, p. 46.

<sup>\*</sup>Only for middle, junior, or senior divisions

**NOTE**: A word can only be used as it is defined in the official dictionary. Therefore, while a student may attempt to write the following sentence using "happy" as an appositive -- The word happy has five letters, -- this is incorrect. Since "happy" is not defined as a noun, it would not meet the Type Demand of noun or the Function Demand of appositive.

## In this game, appositives must be properly punctuated.

- A nonessential appositive provides information that is unnecessary to the meaning of the sentence. The basic meaning of the sentence is the same, with or without the appositive or appositive phrase. Use commas to set off nonessential appositives and appositive phrases.
  - Examples: An interview with Florence Cohen, the well-known landscape architect, will be featured in the paper.
  - Sipa, a game like volleyball, is a popular sport in the Philippines.
- An essential appositive adds information that makes the noun or pronoun it identifies or describes more specific. Without the appositive, the sentence loses necessary information or changes meaning. Therefore, an essential appositive should not be set off by commas.

Examples: The paper will feature an interview with the well-known landscape architect **Florence Cohen**.

The word **peace** is hard to define.

7. NOUN USED AS ADJECTIVE - A noun used as an adjective.

#507

Examples: Mr. Smith is a <u>science</u> teacher.

The window cleaner liked his job.

**NOTE**: Pronouns cannot function as a noun used as an adjective. Nouns used as adjectives can be neither singular nor plural. Since adjectives have no number and nouns used as adjectives function as adjectives, they lose the ability to express number. Participles cannot be used as nouns used as adjectives. A word defined as both a noun and an adjective in the dictionary will not be accepted as a noun used as adjective. The noun used as adjective can include words listed in the dictionary as compound nouns used as two words.

**Example:** The dictionary lists <u>grease</u> as a noun, but also lists the compound nouns <u>grease monkey</u>, <u>grease spot</u>, and <u>grease pencil</u>. The player would be able to write the word grease as a noun used as adjective in any of these uses.

**8. NOUN OBJECTIVE COMPLEMENT\*\*** - A noun or pronoun that follows a direct object and completes its meaning. #541

**Examples:** The committee declared Joe the <u>winner</u>. We elected Mary chairman of the committee.

<sup>\*</sup>Only for middle, junior, or senior divisions

III - 17

9. **RETAINED DIRECT OBJECT\*\*\*** - A retained direct object is a direct object that is retained in the object position when a sentence has been written in the passive voice. #705

**NOTE**: Retained objects can only be found in sentences written in the passive voice. They are separate and distinct from any other type of object since they do not meet the defined functions of such objects. For example, a direct object directly receives the action of the verb; indirect objects indirectly receive the action of the verb, objective complements complete the direct object. Since a passive voice sentence has no action, no object can directly or indirectly receive the action.

**NOTE**: It is suggested (but not required) that students show on their solution papers the sentence written in the active voice for S-V-Retained DO and S-V-Retained IO so that there will be little disagreement as to whether the correct object has been retained. If the student has not done this, either mentally construct such a sentence or <u>ask the player</u> whose solution is in question to do so.

**Examples**: S-V-Retained DO

Noun

Retained Direct Object

Mary was given flowers by the boys. (Retained DO)

To check whether *flowers* is a retained direct object, write the sentence in the active voice to determine whether *flowers* is a direct object. As shown below, it is.

IO DO

The boy gave Mary flowers.

S-V Noun

Retained Direct Object

In an Adverb Clause

Because the teacher was given an apple by the student, she smiled.

The check sentence:

DO

Because the student gave the teacher an apple, the teacher smiled.

10. **RETAINED INDIRECT OBJECT\*\*\*** - A retained indirect object is an indirect object that is retained in the object position when a sentence has been written in the passive voice. #705

**NOTE**: Sentences that retain the indirect object or the objective complement as object will have an unusual sound.

**Example:** Flowers were given the teacher by the boys. (Retained IO)

The check sentence:

IO DO

The boys gave the teacher flowers

III - 18

LinguiSHTIK Judges Manual – 2025-26 Edition

<sup>\*</sup>Only for middle, junior, or senior divisions

<sup>\*\*</sup>Only for junior or senior divisions

# 11. RETAINED OBJECTIVE COMPLEMENT (Noun)\*\*\*

A retained noun objective complement is a noun objective complement that is retained in the object position when a sentence has been written in the passive voice.

**Example:** Marvin was elected <u>president</u> by his friends. (Retained OC-noun)

Susan was voted captain by her team.

The check sentences:

DO OC (noun)

His friends elected Marvin president. Her team voted Susan captain.

#### C. NOUN GENERAL DEMANDS

1 & 2. SINGULAR AND PLURAL - A noun that refers to one person, place, thing, or idea is singular in number. A noun that refers to more than one person, place, thing, or idea is plural.

**NOTE**: Most nouns form their plural by adding -s or -es: bird, birds; house, houses; card, cards. Some nouns, however, are irregular.

<b>Examples:</b>	<u>Singular</u>	<u>Plural</u>
	goose	geese
	mouse	mice
	ox	oxen
	fly	flies
	child	children
	tooth	teeth
	woman	women

In addition, some nouns are the same singular as plural. Some examples: sheep, deer, trout, species

**NOTE**: A verb agrees with its subject in number. Therefore, when a noun is used as a subject, often the verb form will help determine whether the noun is singular or plural. In all other cases, if a determination regarding number cannot be made by reviewing the sentence, then a judge should accept the explanation regarding number offered by the solution writer.

**3. COLLECTIVE NOUNS** - A noun that names a group of persons or things as one item. The **singular form** of a collective noun names a group of persons or things.

#499, #610

**NOTE:** Collective nouns are not defined as such in the official dictionary. Players should verify that the nouns are defined as naming a group as one item.

<sup>\*\*</sup>Only for junior or senior divisions

Even though collective nouns refer to multiple individuals, they still usually function as singular nouns in a sentence. They are referring to one thing: the group as a whole. Here are some examples of collective nouns:

**group** – A group is a single unit that is made up of a number of individuals, people, or things.

**tribe** – A tribe is a single unit that is made up of a group of tribe members.

**fleet** – A fleet is a single unit that is made up of several vehicles or vessels, such as ships.

**band** – A band is a single unit that consists of a number of different musicians.

Collective nouns are used in sentences to refer to a group of people, animals, or things. Examples:

The **flock** of birds flew south for the winter.

The **club** voted to revoke the rules that it had previously approved.

Do not confuse a plural noun with a collective noun. Both can refer to multiple things. The difference is that collective nouns refer to a group of individuals in a single unit, and plural nouns refer to multiple individuals. To understand the difference, consider the following sentence: The **musicians** played the song beautifully. [This sentence contains the plural noun *musicians*.] There are multiple musicians who played the song beautifully. Now look at a similar sentence:

The **orchestra** played the song beautifully. [This sentence contains the **collective noun** *orchestra*.] There is a group of multiple musicians arranged into a <u>single group</u>. Here are two more examples: The **soldiers** marched very swiftly. (plural noun) The **platoon** marched very swiftly. (collective noun)

**NOTE**: A player -- in a separate Demand -- can demand that the collective noun be either singular or plural. A collective noun takes a singular verb when the writer refers to the group as a unit; it takes a plural verb when the writer refers to the individual members or parts of the group.

Collective nouns usually function as singular nouns in a sentence, but they are occasionally used as plurals, too. A collective noun does not form its plural by adding an –s. Consider whether the members of the collective noun are being regarded as a single, whole unit or as multiple individuals. If they are functioning as a whole, then you use singular verb tenses and pronouns; if they are acting individually, then you use plural verb tenses and pronouns.

#### **Examples:**

- 1. *plural collective noun*: The <u>class</u> usually bring their calculators with them. (The speaker is thinking of individuals in the class; note that the use of the plural pronoun "their" means that "class" is plural in this sentence.)
- 2. *singular collective noun:* The <u>class</u> meets Monday, Wednesday, and Friday. (The speaker is thinking of the class as a single thing, a unit).

#### **Some More Collective Nouns:**

army	club	family	herd	staff
assembly	committee	swarm	public	jury (always plural)
audience	crowd	flock	squadron	team
class				troop

<sup>\*</sup>Only for middle, junior, or senior divisions

III - 20

<sup>\*\*</sup>Only for junior or senior divisions

<sup>\*\*\*</sup>Only for senior division

4. NOMINATIVE CASE\*\* - The nominative case is the form of the noun or the pronoun that corresponds with the word's grammatical function in the sentence.

#633-634

**NOTE**: In English, nouns do not have the distinctive nominative case form that pronouns do. Generally, the nominative case is used for subjects and predicate nominatives.

**OBJECTIVE CASE\*\*** - The objective case is the form of the noun or the pronoun that corresponds with the word's grammatical function in the sentence. #635

**NOTE**: In English, nouns do not have the distinctive objective case form that pronouns do. Generally, the objective case is used for direct objects, indirect objects, objects of the preposition, objective complements, retained objects, and subjects and predicate nominatives in infinitive clauses.

**NOTE**: Subjects and predicate nominatives are in the nominative case while direct objects, indirect objects, objective complements, and objects of the preposition are in the objective case. There are only two accepted exceptions to this rule. These are (1) the subject of an infinitive clause is in the objective case and (2) the predicate nominative in an infinitive clause is in the objective case. (This second rule follows from the first since a predicate nominative must be in the same case as its subject).

**Examples**: S-V

Noun Subject

Objective Case

While expecting mother to vote for me, I laughed.

(In the above example, a player not knowing this exception would most likely Challenge Impossible. However, since "mother" is the subject of the infinitive clause "mother to vote for me," mother is in the objective case. In addition, a clause does not need to be demanded before it is included in a sentence.)

Inverted Noun Predicate Nominative Objective Case

"I expected my son to be a doctor," said the man.

(In the infinitive clause "my son to be a doctor," both the subject "son" and the predicate nominative "doctor" are in the objective case.)

**NOTE**: An appositive is always in the same case as the word it identifies.

#### D. PRONOUN GENERAL DEMANDS

1 & 2. SINGULAR\* AND PLURAL\* - In general, see singular and plural for noun.

NOTE: A player can demand that a pronoun be either singular or plural. While many pronouns can be either singular or plural, there are some pronouns that are either always singular or always plural. These include:

<u>Always Singular</u>			<u>Always Plural</u>				
anybody	anyone	much	both	many	others		
anything	each	neither	several	ourselves	them		
either	everybody	nobody	themselves	these	they		
everyone	everything	nothing	yourselves	three, sixty	(etc.)		
other	somebody						
someone	something						

3. INDEFINITE PRONOUN\* - Pronouns that do not fall within the classification of personal, interrogative, demonstrative, relative, or possessive are indefinite pronouns. Most indefinite pronouns express the idea of quantity.

#504

## **Common Indefinite Pronouns**

another	either	neither	some	anybody	several	
everybody	nobody	somebody	anyone	everyone	each	
none	someone	both	many	other	most	such

**NOTE**: Numeric pronouns are indefinite pronouns. **Warning**: Numbers may be listed as nouns, adjectives, and pronouns in the dictionary. Its usage will determine the part of speech.

**Examples.** An indefinite pronoun used as a subject:

Twenty ran to the store.

The use of the article or noun marker makes twenty a **noun** here:

The twenty formed a great team.

A number used to describe itself is a noun:

Twenty is a number.

A number modifying a noun is an adjective:

The twenty animals are horses.

**4. PERSONAL PRONOUN\*** - Pronouns that refer to the one speaking (1<sup>st</sup> person), the one spoken to (2<sup>nd</sup> person), or the one spoken about (3<sup>rd</sup> person). In addition to 1<sup>st</sup>, 2<sup>nd</sup>, or 3<sup>rd</sup> person, personal pronouns may be singular or plural, and they may be nominative case\*, objective case\*, or possessive case. #502, 633

See: Personal Pronoun Chart on page III - 24

**5. INTERROGATIVE PRONOUN\*** - Pronouns that are used to begin questions.

#503

**Examples**: whom, which, what, whose

whoever and whomever -- when used to begin questions.

What is the capital of Florida? Whose is this red sweater?

**6. DEMONSTRATIVE PRONOUN\*\*\*** - Pronouns used to point out a noun or another pronoun #503

CHANGED in 2025

**Examples**: this, these, that, those

Is **this** the one you want?

**These** or **those** are the pictures from our vacation.

7. **RELATIVE PRONOUN\*\*\*** - Pronouns that are used to begin a dependent clause.

#503

**Examples**: who, whom, which, that, whose

The college **that** I chose is in Texas. (begins an adjective clause)

**NOTE**: Pronouns that introduce noun clauses are indefinite relative pronouns and should be accepted as either indefinite or relative pronouns.

**NOTE**: When <u>whoever</u> or <u>whomever</u> are used to introduce a subordinate clause, they are relative pronouns. When <u>whoever</u> and <u>whomever</u> are used to begin a question, they are interrogative pronouns.

**8. NOMINATIVE CASE\*\*** - The pronoun is used as the subject or predicate nominative in a sentence.

Examples: They are always correct. (used as a subject)

The most polite students in the class are **they**. (used as the predicate nominative)

9. **OBJECTIVE CASE\*\*** - The pronoun is used as the direct object, the indirect object, or object of a preposition in a sentence.

## **Examples:**

Luis has invited **them** to his party. (used as the direct object)

Their father bought <u>them</u> rain ponchos during the storm. (used as indirect object) Will we be going with <u>them</u> to the party? (used as object of the preposition)

**10. POSSESSIVE CASE\*\*** - The personal pronouns in the possessive case are used to show ownership or possession.

#640-641

Possessive pronouns **mine**, **yours his**, **hers**, **ours**, **and theirs** are used in the following ways:

SUBJECT: Mine has a flat tire.

PREDICATE NOMINATIVE: This desk is hers.

DIRECT OBJECT: We have not received ours yet.

INDIRECT OBJECT: Do they give theirs a weekly allowance?

OBJECT OF THE PREPOSITION: My mother wants to talk to yours.

<sup>\*</sup>Only for middle, junior, or senior divisions

<sup>\*\*</sup>Only for junior or senior divisions

<sup>\*\*\*</sup>Only for senior division

# 11. PERSONAL PRONOUN CHART\*

(Words suitable for LinguiSHTIK- more than 3 letters - are underlined in bold.)

PERSONAL PRONOUNS					
	<b>Nominative Cas</b>	e	<b>Objective Case</b>	]	<b>Possessive Case</b>

	<b>Nominative Cas</b>	e	<b>Objective Case</b>	]	<b>Possessive Case</b>
PLURAL					
First Person Second Person Third Person	we you <u>they</u>		us you <u>them</u>		our, <u>ours</u> your, <u>yours</u> their, <u>theirs</u>

#### **SECTION IV: VERBS**

#### A. TYPE DEMAND

**VERB** - A word that expresses action, a condition, or a state of being. #509

**Examples**: He <u>played</u>. (action)

We <u>were</u> in the park. (state of being) She <u>is</u> cute. (condition/linking)

**NOTE**: When forming a verb tense or form consisting of more than one word, the word to be formed must be the main verb.

#### NOTE ON VERB PARTICLES:

In the English language you will occasionally find a construction where a verb is followed by what appears to be a prepositional phrase; however, upon closer inspection, you will notice that it is impossible to separate the preposition from the verb.

**Example**: The boy turned on the music.

In this particular sentence, the verb is **turned on**, if the meaning is taken to be that he flipped the switch that provided power to the stereo, and music becomes a direct object.

If, however, the meaning of *turned on* is that he turned or mentally changed positions then the verb is *turned* and *on the music* is a prepositional phrase with *music* being the object of the preposition. That is true in this sentence: *He turned on Third Street*. Other examples of such verb particles would be *put down* (He put down the book.), *blew up* (The clown blew up the balloon.) and *take off* (Take off your wet shoes.).

Occasionally you will also come across a verb followed by two particles. Example: **put up with** (He put up with her antics.) **stay away from** (Stay away from that boy!), **check up on** (The boy will check up on that problem.) These are all more or less idiomatic expressions and can usually be translated to one more precise word, **put up with** (tolerate), **stay away from** (avoid), **check up on** (investigate). Take care not to write verb particles since they are not considered one-word main verbs.

#### **B.** FUNCTION DEMANDS (LT 10)

MAIN VERB – This is the verb in a clause that identifies the action or state of being of the subject of the clause.

#509

Note: If an infinitive clause is written, the verb is considered an infinitive **not** a main verb. Example: We wanted the boys *to play* fairly. In that sentence *to play* is an infinitive

that takes a subject (boys), not a main verb.

**Examples:** The boy <u>cried</u>.

The girl is laughing.

The lady became a doctor.

When the bell rang the children left the classroom.

2. AUXILIARY\* - A verb used in conjunction with the main verb to create tense and mood. If *Auxiliary* is called, the player uses the cubes to form the helping verb only, not the main verb.

#509

<sup>\*</sup>Only for middle, junior, or senior divisions

**Example:** We <u>should have been</u> working on the project during the last two weeks. (The player could make any one of the three auxiliary verbs underlined above.)

## Common auxiliary verbs:

been being were have does should might must could will shall

**3. INFINITIVE** - An infinitive is a verb form that can be used as a noun, an adverb, or an adjective. Most infinitives begin with *to*.

\*\*Players can call additional Function Demands (e.g., noun, adjective, or adverb) when infinitive has been selected. [Note: this additional demand requires the function of just the infinitive, not an infinitive phrase.]

#564

**Examples**: S-LV-PA

Verb Infinitive

Infinitive functions as subject

To wait is tiresome.

S-V-DO Verb Infinitive

Infinitive functions as direct object

Everyone wanted to play.

S-V-DO-OC (adj)

Verb Infinitive

Infinitive functions as adjective objective complement

We lacked the strength to resist.

S-V Verb Infinitive

Infinitive functions as adverb

We study to <u>learn</u>.

**NOTE**: In LinguiSHTIK, the word to be formed with the playing cubes is the infinitive itself, not including the "to." The word "to," called the sign of the infinitive, is sometimes omitted such as in: She made me (to) leave. Help me (to) do my homework. However, the "to" needs to be written if required by the sense of the sentence.

4. **GERUND\*** - In general, a gerund is a verb form ending in "-ing" that is used as a noun. Since a gerund can be used as a noun, players can call additional Function Demands when gerund has been selected. [Note: this additional demand requires the function of just the gerund, not a gerund phrase.] #562

<sup>\*</sup>Only for middle, junior, or senior divisions

**Examples**: S-V-DO

Verb Gerund

Gerund must function as subject

Photographing requires great patience.

S-V-DO

Verb

Gerund

Gerund must function as object of the preposition

In <u>answering</u>, give specific examples.

S-V-DO

Verb

Gerund

Gerund must function as direct object

Please stop whispering.

**NOTE**: A gerund may be written in the passive voice by using being + past participle. Care must be taken to make sure they are used properly and not confused with participles. When a passive voice gerund is used, the word to be formed with the playing cubes is the past participle, not including the "being."

Example using a passive voice gerund: She does not like being filmed.

The gerund being filmed is used as a DO. The player would make the word filmed.

Example using a participle: The girl being filmed was not happy.

The participle being filmed is a noun modifier describing girl.

**NOTE**: A gerund may be used in almost any way in which a noun may be used except as a noun used as adjective.

Gerunds should not be confused with present participles.

5. PARTICIPLE\* - A participle is a verb form used as an adjective. It comes in two forms: the present that ends in "-ing" and the past that often ends in "-ed," "-d," "-en," "-n," or "-t." Present participle and past participle are General Demands for Middle, Junior, and Senior Divisions. (See numbers 6 & 7 in Section C: VERB GENERAL DEMANDS, p. 29). #558

**Examples:** The rapidly developing storm kept small boats in port.

The broken toys could not be replaced easily.

**NOTE:** In addition to their present and past forms, participles have a *present* perfect form. This form adds having or having been to the past participle of a verb and indicates a completed action.

**Examples:** Having completed his chores, Brian went to play in the park.

Having been declared the winner, she joyfully accepted the trophy.

**NOTE**: A participle is a verb form functioning as an adjective. As such, while progressive form verbs look like participles, they are not; rather they are verbs functioning as verbs.

**Examples:** I have been shopping. I was swimming.

<sup>\*</sup>Only for middle, junior, or senior divisions

#### C. VERB GENERAL DEMANDS

1 & 2. SINGULAR AND PLURAL - A verb demonstrates its number in relation to its subject.

**NOTE**: A verb agrees with its subject in number. Therefore, in most cases, a determination regarding number can be made by reviewing the verb in context. When such a determination cannot be made, then a judge should accept the explanation regarding number offered by the solution writer.

3. LINKING VERBS - A linking verb joins the subject with a noun/pronoun or adjective that identifies or describes the subject and shows no action. Linking verbs are always intransitive. #511

**NOTE**: The most common linking verb is "be" and all of its forms (am, is, are, was, etc.). Only *were*, however, contains at least four letters. There are several other linking verbs in addition to *be*. See the list below:

## List of Linking Verbs other than Forms of be

appear	grow	seem	stay
become	look	smell	taste
feel	remain	sound	turn

- 4. **REGULAR VERB** A regular verb is one that forms its past and past participle by adding "-d" or "-ed" to the infinitive form. #1106
- 5. IRREGULAR VERB An irregular verb is one that forms its past and past participle in some other way than a regular verb. #1100

**NOTE**: This other way may involve changing the spelling of the verb or making no change at all.

#### List of Irregular Verbs

Past	Past Participle
was	been
became	become
began	begun
bit	bitten
blew	blown
burst	burst
caught	caught
chose	chosen
came	come
dived, dove	dived
did	done
drew	drawn
drove	driven
ate	eaten
fell	fallen
found	found
flung	flung
flew	flown
	was became began bit blew burst caught chose came dived, dove did drew drove ate fell found flung

gotten

6 & 7. PRESENT AND PAST PARTICIPLES\*\* - A present participle ends in "-ing." A past participle often ends in either "-ed," "-d," "-en," "-n," or "-t." See list of irregular verbs above for irregular past participles.

wrote

8. SIMPLE TENSES - The simple tense of the verb is the plain form of the verb. Players can demand that a verb be in either the simple present tense, simple past tense, or simple future tense. Simple tenses may have voice and/or form. (See Simple Tense Verb Chart.) For example, simple tenses may be in the active or passive voice, as well as the emphatic form. However, if a simple tense verb is demanded, for example, "simple present," and another "present" verb form is used in its place, for example present progressive, then the verb does not meet the requirements of simple present.

#695-696

**Examples**: I <u>walk</u> to the store. (Simple present)

I <u>walked</u> to the store. (Simple past)
I <u>will walk</u> to the store. (Simple future)
I <u>do walk</u> to the store. (Simple present)
I <u>did walk</u> to the store. (Simple past)

Note: if main verb is demanded, only the main verb is the word to be formed (and underlined) even if an auxiliary verb is also present, and vice-versa.

<sup>\*</sup>Only for middle, junior, or senior divisions

<sup>\*\*</sup>Only for junior or senior divisions

### 9. PERFECT TENSES

**PRESENT PERFECT TENSE\*\*** - The present perfect tense expresses an action or a state of being that occurred at some indefinite time in the past. To form the present perfect tense, use <u>has</u> or <u>have</u> with the past participle of the main verb.

#697

**Examples:** You <u>have given</u> more money to charity this year than ever before.

He <u>has worked</u> for us many times.

**PAST PERFECT TENSE\*\*** - The past perfect tense is used to describe existing or happening before a specific time in the past. To form the past perfect tense, use *had* with the past participle of the main verb.

#698

**Examples:** She <u>had given</u> the signal to start the race before they were ready.

When I had worked for a week, I asked for my pay.

FUTURE PERFECT TENSE\*\* - The future perfect tense is used to describe existing or happening before a specific time in the future. To form the future perfect tense, use <u>will have</u> or <u>shall have</u> with the past participle of the main verb.

#698

Examples: We will have given all the raffle prizes away before the evening is

over.

By the time school opens, I will have worked here eight years.

**PROGRESSIVE FORMS\*\*** - Each tense has an additional form called the **progressive form** that expresses continuing action or being. To form the progressive, use the appropriate tense of the verb <u>be</u> with the present participle of the main verb. The verbs in the progressive form use a form of "to be" + the present participle (an ing verb). (It is the form of the helping verb that indicates the tense.) #693-694

#### PRESENT PROGRESSIVE FORM\*\*

**Examples:** The students <u>are waiting</u> patiently for the bus.

The teacher is giving her students the graded test papers now.

PAST PROGRESSIVE FORM\*\*

**Examples:** I was researching the life and times of John F. Kennedy.

They were giving their undivided attention to the new performer.

**FUTURE PROGRESSIVE FORM\*\*** 

**Examples:** I will be walking the dog for the next two hours.

They will be attending a state university next year.

### 11. PERFECT PROGRESSIVE FORMS\*\*

### PRESENT PERFECT PROGRESSIVE FORM\*\*

**Examples:** Who has been playing my CD's?

The reality show has been pairing women with eligible bachelors.

IV - 30

<sup>\*</sup>Only for middle, junior, or senior divisions

<sup>\*\*</sup>Only for junior or senior divisions

#### PAST PERFECT PROGRESSIVE FORM\*\*

Examples: I had been looking through dozens of old magazines before I found

the article I needed for my report.

She had been driving since early morning and wanted to stop.

#### **FUTURE PERFECT PROGRESSIVE FORM\*\***

**Examples:** By the time the bus arrives, we will have been waiting two hours.

The newspaper will have been publishing for twenty-five years

when this year ends.

**12. FUNCTIONS FOR INFINITIVES\*\*** - When infinitive is the Function Demand, a player may subsequently demand how that infinitive will function. (See discussion of infinitives in this Section under Function Demands, p. 26). **#564** 

**13. FUNCTIONS FOR GERUNDS\*\*** -When gerund is the Function Demand, a player may subsequently demand how that gerund will function. (See discussion of gerund in this Section under Function Demands, p. 26). #562

Note: For Functions for Infinitives or Functions for Gerunds, these Demands are for simple infinitives or simple gerunds, not infinitive phrases or gerund phrases.

**14. ACTIVE VOICE\*\*\*** - An active voice verb expresses an action performed by its subject. #705

**Examples:** The students completed the project.

They <u>planted</u> trees in the park.

15. PASSIVE VOICE\*\*\* - A passive voice verb expresses an action performed on its subject or makes the subject the result of the action. Frequently with passive voice the subject will actually be the receiver of the action. (The action is performed on the subject). A verb in the passive voice always includes a form of be and the past participle of a verb. The form of be and the helping verb, if any, indicate the tense of the verb phrase.

#705-706

**Examples**: The project <u>was completed</u> by the students.

The trees in the park have been planted by the city.

### D. VERB CHARTS

SIMPLE VERB TENSES					
PRESENT PAST FUTURE					
Active	Passive	Active	Passive	Active	Passive

Future Perfect Progressive Form - Active Voice: The orchestra will have been playing the

symphony.

Future Perfect Progressive Form - Passive Voice: The symphony will have been being played by

the orchestra.

**NOTE:** Caution should be taken when calling demands for verbs, especially in the Junior or Senior Division. The only legal demands are those listed on the Order of Play Sheets for each division. Listed demands cannot be combined as one demand.

#### **SECTION V: ADJECTIVES**

#### A. TYPE DEMAND

**ADJECTIVE** - A word that modifies a noun or pronoun.

#502, 722

### **B.** FUNCTION DEMANDS

- 1-2. NOUN / PRONOUN MODIFIER There is no restriction on the meaning of noun/pronoun modifier. As such, a predicate adjective, adjective objective complement, or an adjacent adjective will be accepted as a noun/pronoun modifier.
- 3. **PREDICATE ADJECTIVE** An adjective that follows a linking verb and modifies the subject of the linking verb. #506

**Examples:** The rooms in the old house smelled musty.

Those strawberries look ripe to me.

**4. ADJACENT ADJECTIVE -** An adjective that immediately precedes or follows the noun or pronoun that it modifies. #506

**Examples:** I bought the <u>brown</u> hat for Sarah.

The <u>tired</u>, <u>hungry</u> hikers straggled into camp. Ms. Dunham is a creative, talented dancer.

(The second and third sentences above each have two adjacent adjectives)

**NOTE**: Predicate adjectives and adjective objective complements will not be accepted as adjacent adjectives since they have their own specific grammatical function in the sentence.

**5. ADJECTIVE OBJECTIVE COMPLEMENT\*\*** - An adjective that follows a direct object and completes its meaning.

**Examples:** Most players found the new video games enjoyable.

Lack of ventilation made the workroom stuffy.

6. **RETAINED OBJECTIVE COMPLEMENT (ADJ)\*\*\*** - A retained adjective objective complement is an adjective objective complement that is retained in the object position when a sentence has been written in the passive voice.

**Example:** Martha was considered <u>pretty</u> by Howard.

DO OC (adj)

The check sentence: Howard considered Martha pretty.

#### C. ADJECTIVE GENERAL DEMANDS

1. **DEGREES OF COMPARISON** - Adjectives have three degrees of comparison: positive, comparative, and superlative. #730

NOTE: There are some modifiers that have no comparative or superlative forms; they do not vary in degree. Grammar books often refer to them as "absolute adjectives." These modifiers will be considered positive for the purposes of the game. #735

**POSITIVE** - the positive degree of comparison is the simple form of the a. adjective used to describe a noun.

**Examples:** fast – She is a fast runner.

good – That young man is a good student.

b. **COMPARATIVE** - The comparative degree is used to compare two things. It is usually formed by adding "-er" as an ending, or by using "more" or "less" in front of the adjective.

**Examples:** faster – She is a <u>faster</u> runner than Sam.

better – He is a better student than I am.

curious – She is more <u>curious</u> about her grades than I am.

**SUPERLATIVE -**The superlative degree of comparison is used to c. compare three or more things. It is usually formed by adding "-est," as an ending, or by using "most" or "least" in front of the adjective.

**Examples:** agile – Joan is the most <u>agile</u> runner on our track team. best – He has the best chance of the three to make the team.

NOTE: Some modifiers of two syllables and all adjectives of three or more syllables have their comparative and superlative degrees of comparison formed by using the words more and most or less and least. Most two-syllable modifiers can form their comparative and superlative forms either way. If adding -er or -est makes a word sound awkward, use more or most instead. Looking up the adjective in the dictionary will answer most questions about forming comparative and superlative forms.

When either Comparative or Superlative degree is called, the player may specify regular or irregular in the same demand.

2. **REGULAR AND IRREGULAR ADJECTIVES\* -** A regular adjective is one that forms its degrees of comparison in accordance with the methods outlined above. Irregular adjectives do not follow the regular methods of forming their degrees of comparison. #731

<b>Examples</b> :	bad	worse	worst	far	farther	farthest
	far	further	furthest	good	better	best
	ill	worse	worst	little	less	least
	many	more	most	much	more	most
	well	better	best			

<sup>\*</sup>Only for middle, junior, or senior divisions V - 35 LinguiSHTIK Judges Manual – 2025-26 Edition \*\*\*Only for senior division

<sup>\*\*</sup>Only for junior or senior divisions

### **SECTION VI: ADVERBS**

#### A. TYPE DEMAND

**ADVERB** - A word that modifies a verb, adjective, or adverb.

#722

B. FUNCTION DEMANDS—In the Elementary Division, if the Type Demand is Adverb, there is no Function Demand. Player Three would either make a General Demand or play a cube to LETTERS.

CHANGED in 2024

1. **VERB MODIFIER\*** - An adverb that modifies a verb. Normally, an adverb functioning as a verb modifier will tell either how, when, where, or to what extent (how often or how much) the action of the verb is done.

**Examples:** The cruise ship moved <u>quickly</u> on the calm ocean.

The raccoon disappeared <u>silently</u> in the bushes.
The college student came <u>home</u> for the holidays.
I could almost see the eye chart at the doctor's office.

The cheerleader practices <u>early</u> and <u>late</u>.

2. ADJECTIVE MODIFIER\* - An adverb that modifies an adjective.

**Examples:** The new student was really handsome.

The very excited audience cheered and applauded.

Riding in the back seat of a car makes me slightly nauseated.

**3. ADVERB MODIFIER\*** - An adverb that modifies an adverb.

**Examples:** The young boy behaved very well at his sister's wedding.

During the heavy rain, the river rose somewhat rapidly.

### C. ADVERB GENERAL DEMANDS

1. **DEGREES OF COMPARISON\*** - <u>See</u> Degrees of Comparison and Notes about forming Comparative and Superlative modifiers under Adjectives.

**Examples:** The current in the river moved <u>swiftly</u>. (positive)

The current moved more swiftly in the river than in the stream. (comparative)

The student planned for the test better than his friend. (comparative)

The runner moved most <u>swiftly</u> of all the track team members. (superlative).

You cheered <u>best</u> when your favorite singer was on stage. (superlative)

2. **REGULAR AND IRREGULAR ADVERBS\*** - See Regular and Irregular under Adjectives, p. 35. #731

NOTE: When either Comparative or Superlative degree is called, the player may specify regular or irregular in the same demand.

<sup>\*</sup>Only for middle, junior, or senior divisions VI - 36 LinguiSHTIK Judges Manual - 2025-26 Edition \*\*Only for junior or senior divisions \*\*\*Only for senior division

### **SECTION VII: PREPOSITIONS**

### A. TYPE DEMAND

B.

CHANGED

in 2024

**PREPOSITION** - A word used to introduce a phrase that shows a relationship between the object of the preposition and another word in the sentence. #517

**NOTE**: If compound is called during the course of the shake, this does not mean "compound preposition," for those are two or more separate words functioning together as one preposition. Instead, the player should use a preposition that is a compound word.

### **Commonly Used Prepositions**

about	at	but (except)	inside	through	upon
above	before	by	into	throughout	with
across	behind	concerning	like	to	within
after	below	down	of	toward	without
against	beneath	during	off	under	
along	beside	except	on	underneath	
amid	besides	for	over	until	
among	between	from	past	unto	
around	beyond	in	since	up	

FUNCTION DEMANDS—In the Elementary Division, if the Type Demand is Preposition, there is no Function Demand. Player Three would either make a General Demand or play a cube to LETTERS.

1. INTRODUCTORY WORD IN AN ADJECTIVE PHRASE\* - A preposition that introduces a prepositional phrase used as an adjective. #554

Examples: The class <u>after</u> lunch is my favorite <u>of</u> the whole day.

[The prepositional phrase <u>after lunch</u> describes **which** class.

The prepositional phrase <u>of the whole day</u> describes **which** favorite.]

The shadow <u>behind</u> the door scared the little girl.

[The prepositional phrase <u>behind</u> the door describes **which** <u>shadow</u>.]

2. INTRODUCTORY WORD IN AN ADVERB PHRASE\* - A preposition that introduces a prepositional phrase used as an adverb. #556

Examples: We first heard the rumor <u>after</u> lunch.

[The prepositional phrase *after lunch* tells **when** it was *heard*.]

He hid <u>behind</u> the door as a practical joke.

[The prepositional phase *behind the door* tells **where** he *hid*.]

### **SECTION VIII: CONJUNCTIONS**

### A. TYPE DEMAND

**CONJUNCTION\*** - A word used to join words, phrases or clauses. #519

### **B.** FUNCTION DEMANDS

## 1. SUBORDINATING CONJUNCTIONS (SUBORDINATORS)\* Conjunctions that introduce dependent clauses, usually adverb clauses. #520

**NOTE**: The subordinator will show a relationship between the clause and a word in the sentence.

### **Some Commonly Used Subordinating Conjunctions**

**NOTE:** This list does not presume to be all-inclusive. Some of these words may be used for other functions.

after	provided	unless	where
although	since	until	wherever
because	than	when	whether
before	that	whenever	while
lest	though		

2. CONJUNCTIVE ADVERB\* - This is an adverb used to join two independent clauses. #588

**NOTE**: A conjunctive adverb is properly punctuated by a semicolon preceding the adverb and a comma following it. A sentence written with a conjunctive adverb MUST be correctly punctuated, (even if *conjunctive adverb* was not demanded). (LT 23 (F))

**Examples:** We should leave early; <u>otherwise</u>, we will miss our bus.

The team won their last game; therefore, they will go to the playoffs.

### **Some Common Conjunctive Adverbs**

**NOTE:** This list does not presume to be all-inclusive. Some of these words may be used for other functions.

again	anyway	finally	indeed	next	still	then
also	besides	however	moreover	otherwise	therefore	thus

#### SECTION IX: INTERJECTIONS

### A. TYPE DEMAND

INTERJECTION - A word that expresses emotion and has no grammatical relation to the rest of the sentence. #522

Examples: Ouch! That hurt! or Ouch! That hurt. or Ouch! Did that hurt?

Ahem, you are eating your soup with your fork!

**NOTE**: For the purpose of the game, interjections must be punctuated in either of the two ways illustrated above: 1) an exclamation point after the interjection, and the rest of the sentence capitalized with correct end punctuation, or 2) a comma after the interjection, with an exclamation point at the end of the sentence.

**NOTE**: If the interjection has a grammatical function in a sentence, then it is not an interjection.

**Examples**: S-V-DO

Interjection

The boy cried, "Ouch!"

(**Incorrect:** The quote "Ouch" functions as the direct object of the sentence, **not** an interjection.)

S-V-DO Interjection

The boy said, "Ouch, that hurts!"

(Correct: "Ouch" is an interjection. The entire noun clause is the direct object.)

**NOTE**: Care should be given when attempting to use imperative verbs as interjections. First, they are not listed in the dictionary as interjections. In addition, depending on usage, imperative verbs have an understood subject ("you") and function as a predicate verb in the sentence.

**Example:** (you) Stop, the train is coming!

(**Incorrect:** stop is used as a verb in this sentence.)

<u>JUDGES' NOTE</u>: When faced with a word that is listed in the dictionary as both a verb and an interjection, if punctuated and used correctly, the word can be accepted as an interjection.

**Example:** Check! We have all the camping equipment loaded on the bus.

(Correct: check is listed in the dictionary as **both** a verb and an interjection, and this sentence clearly uses it as an interjection meaning "used to express agreement."

**NOTE**: In the game of LinguiSHTIK, a word may be used as an interjection **only** <sup>1</sup>if the official dictionary lists it as such or <sup>2</sup>indicates that the word may be used interjectionally.

## **List of Some Common Interjections**

**NOTE:** This list does not presume to be all-inclusive.

alas	eureka	hurrah	goodness	(used interjectional	lly)
ahem	goody	hurray	ouch	yippee	
ahoy	hooray	oops	rats	zowie	

### **B. FUNCTION DEMAND**

If the Type Demand is Interjection, there is no Function Demand. Player Three would either make a General Demand or play a cube to LETTERS.

### **SECTION X: CLAUSES**

As a General Demand, a player can demand that **the word to be formed must be contained in** the following clauses. (LT 16M).

- A clause is a group of words containing a subject and its predicate.
- Clauses may be independent or dependent.
- A clause that can stand alone if removed from its sentence is an independent clause.

#576

in 2024

**NOTE**: The number of times in a shake that a clause or phrase can be demanded depends on the division. In the **elementary division**, this Demand can only be made **once per shake**. In the **middle, junior and senior divisions**, this Demand can only be made **twice per shake**.

NOTE: a clause that modifies a word in a clause is said to be IN the clause that it modifies.

CHANGED in 2025

**NOTE:** In the **senior division**, when the Demand has been made that the word must be in a clause or phrase, the player may choose from a list to specify how the listed clause or phrase is to function in the sentence. (**LT 16**)

A. DEPENDENT CLAUSE (SUBORDINATE) (not a legal demand) - A clause that does not express a complete thought and cannot stand by itself as a sentence is a dependent (or subordinate) clause. #577

**NOTE**: Dependent (subordinate) clauses function grammatically in a sentence as nouns, adjectives, or adverbs, and are used in the same way as single words and phrases.

1. NOUN CLAUSE - A noun clause is a subordinate (dependent) clause used as a noun. It serves the purpose of a single noun. #581

**NOTE**: Direct quotes that contain a subject and a verb or the imperative form of a verb will be treated as noun clauses.

**Examples:** John said, "I ran to the store." (Correct)

John said, "Hello."

(**Incorrect**: Since this is a single word direct quote that does not contain a subject and a verb, it is not a noun clause.)

Considering saying, "I want to go home," the boy cried.

(**Correct**: Note that not only does this sentence contain a noun clause, but the noun clause is contained in a gerund phrase that begins with *saying*, and is also contained in a participial phrase that begins with *Considering*).

Whoever baked me this cake is a nice person. (Correct)

**NOTE**: Noun clauses are sometimes written without an introductory word. In this game, it is acceptable to omit the introductory word in a noun clause when it is appropriate.

**Example:** She says my mother is nice. (the "that" has been omitted).

NOTE: For examples of the ways noun clauses can be used in a sentence, see examples on page X - 44. See the difference between an Adjective Clause and a Noun Clause used as Appositive on page X- 45.

<sup>\*</sup>Only for middle, junior, or senior divisions

X - 41 LinguiSHTIK Judges Manual - 2025-26 Edition

<sup>\*\*</sup> Only for junior or senior divisions

<sup>\*\*\*</sup>Only for senior division

2. ADJECTIVE CLAUSE - An adjective clause is a subordinate (dependent) clause that, like an adjective, modifies a noun or pronoun. #578

**Examples:** The paper that my sister wrote was about the space shuttle program.

(The clause modifies the noun paper.)

Mr. Smith is a good counselor who never betrays a confidence.

(The clause modifies the noun Mr. Smith.)

She is the one whose essay took first place.

(The clause modifies the pronoun *one.*)

NOTE: See the difference between an Adjective Clause and a Noun Clause used as Appositive on page X - 45.

**3. ADVERB CLAUSE -** An adverb clause is a subordinate clause that, like an adverb, modifies a verb, an adjective or an adverb. #584

**NOTE**: An adverb clause will normally tell *how, when, where, why, to what extent,* or *under what conditions*.

**Examples:** The squirrel ran <u>as though it were being chased by a cat</u>. [how]

Many artists became famous while they studied art in Paris. [when]
The rock star attracts huge audiences wherever he performs. [where]
This class is important because it is required for college entrance. [why]
Daniella likes rap music more than she likes rock music. [how much]
If you want to pass, you must do all your work. [under what conditions]

**NOTE**: Some of the words that introduce adverb clauses may also introduce adjective clauses and noun clauses. To determine what type of clause the introductory word begins, look at how the clause is used in the sentence.

**Examples:** The day when we got our puppy was a Friday.

(adjective clause describing which day)

Does Jimmy remember when we got our puppy?

(**noun clause** acting as a direct object of the verb *remember*)

Our older dog sulked a little when we got our puppy.

(adverb clause modifying the verb *sulked*)

NOTE: For examples of the ways adverb clauses can be used in a sentence, see examples on page X - 45.

**4. INFINITIVE CLAUSE\*** - An infinitive clause is a dependent clause where the infinitive takes a subject.

The subject, the infinitive and any complements or modifiers make up the clause.

An infinitive clause is a type of noun clause.

#566, 582

**Examples:** I believe them to be trustworthy.

We wanted them to lead the discussion.

Everyone expects my mother to win the baking contest at the fair.

**NOTE**: Verbs such as *expected*, *wanted* and *asked* are the most commonly used verbs to introduce infinitive clauses.

<sup>\*</sup>Only for middle, junior, or senior divisions X - 42 LinguiSHTIK Judges Manual -2025-26 Edition

<sup>\*\*</sup> Only for junior or senior divisions

<sup>\*\*\*</sup>Only for senior division

**NOTE**: The subject of the infinitive clause is in the objective case. A predicate nominative (noun) referring to the subject of the infinitive clause is in the objective case, since a predicate nominative matches the case of its subject.

Examples: I expected <u>mother to vote for me</u>.

(mother functions as a subject in the infinitive clause and is in the objective case)

I expected my daughter to be a doctor.

(*doctor* functions as a predicate nominative in the infinitive clause and is in the objective case.)

**NOTE**: It is easy to mistake an infinitive phrase for an infinitive clause. The key is that in infinitive clauses the infinitive takes a subject. The subject of the infinitive clause is doing the action of the infinitive. Ex. I want them to lead the parade. The subject of the infinitive is them because that is who is leading the parade.

NOTE: For examples of the ways infinitive clauses can be used in a sentence, see examples on page X - 45.

CHANGED in 2025

ELLIPTICAL CLAUSE\*\*\* An elliptical clause is a clause in which some words have been left out when its meaning can be clearly understood. Most elliptical clauses are adverb clauses that begin with a subordinating conjunction and have an understood subject and/or auxiliary verb. For the purposes of the game of LinguiSHTIK, when elliptical clause is demanded, it must be a dependent clause. Independent elliptical clauses can be used in your sentence, just not demanded. #585

**Examples:** Australia is smaller than the other continents (are small).

When (you are) taking notes, use your own words.

I like Anne <u>as much as</u> (I like) <u>her</u>.
I like Anne <u>as much as she</u> (likes Anne).

(Be sure to use the correct pronoun case for an elliptical clause.)

**NOTE**: Elliptical Clauses are a favorite of students wanting to call several clauses. However, there are pitfalls with elliptical clauses. <u>See</u> the example below.

**Example:** S-V-DO **Solution sentence (correct):** 

Noun Considering walking the <u>dogs</u>, I tied my shoes.

Direct Object In a Gerund Phrase In a Participial Phrase

(This sentence is **correct**! -- If you do not understand how, look at the participial phrase section below).

However, students attempt to also add a General Demand: **In an elliptical clause** and then modify the sentence as shown below.

**Solution sentence (incorrect):** 

While considering walking the dogs, I tied my shoes.

(This is **WRONG**. When you insert the ellipsed subject, the sentence becomes "While [I was] considering walking the dogs, I tied my shoes." It is clear that the subordinate conjunction "while" changed the participle "considering" into a past

<sup>\*</sup>Only for middle, junior, or senior divisions

X - 43 LinguiSHTIK Judges Manual - 2025-26 Edition

<sup>\*\*</sup> Only for junior or senior divisions

progressive verb. Of course, without the participle, there can be no participial phrase. There is, however, both an elliptical clause and gerund phrase in the above sentence.)

## B. FUNCTIONS FOR NOUN, ADJECTIVE, ADVERB, AND INFINITIVE CLAUSES

\*\*\*In the Senior Division the player may specify the function of a clause or a phrase. Here are some example sentences for noun, adjective, adverb, and infinitive clauses. Sentences showing the functions of various types of phrases are located with each phrase definition as examples.

- 1. Noun clauses perform the same functions in sentences that single nouns do.
  - a) A noun clause can be a **subject** of a verb:

Example: What the child said shocked his parents.

Compare: The <u>remark</u> shocked his parents.

b) A noun clause can be a **direct object** of a verb:

Example: His friends did not know that he could not swim.

Compare: His friends did not know his problem.

c) A noun clause can be a **predicate nominative**:

Example: His remarks were whatever came to his mind first.

Compare: His remarks were his first thoughts.

d) A noun clause can be an **object of a preposition**:

Example: He often sends flowers to whoever is sick.

Compare: He often sends flowers to sick people.

e) A noun clause can be an indirect object:

Example: They give whoever comes a name tag.

Compare: They give each arrival a name tag.

f) A noun clause can be an **appositive**:

Example: My fear that the class would laugh at me proved groundless.

Compare: My fear, the laughter by the class, proved groundless

g) A noun clause can be an **objective complement**:

Example: I named him whatever I wanted.

Compare: I named him friend.

- 2. Adjective Clauses can function as adjectives.
  - a) An adjective clause can be an **objective complement**:

Example: The students wanted a lesson that was interesting.

b) An adjective clause can be a **noun modifier**:

Example: The student who won the game was the smartest.

c) An adjective clause can be a **pronoun modifier**:

Example: He who must not be named is evil.

- 3. Adverb Clauses can function as adverbs.
  - d) An adverb clause can be a verb modifier:

Example: The children laughed because they were happy.

e) An adverb clause can be an adjective modifier:

Example: The mango was riper than the peaches were.

f) An adverb clause can be an adverb modifier:

Example: The latest hurricane moved faster than the previous one did.

- 4. Infinitive clauses can function as nouns.
  - a) An infinitive clause can be a **direct object**:

Example: The teacher declared the student to be a good role model.

b) An infinitive clause can be the **object of a preposition**:

Example: They are waiting for the bus to take them home.

c) An infinitive clause can be a **predicate noun**:

Example: That is the bus to take them home.

### Adjective Clause or Noun Clause used as an Appositive?

An adjective clause modifies a noun or pronoun. The noun clause used as appositive identifies or explains the noun or pronoun beside it and can take the place of that noun or pronoun.

a) ADJECTIVE CLAUSE: The theory **that Copernicus proposed** was rejected by most other astronomers.

The underlined words modify the word *theory*.

b) NOUN CLAUSE USED AS APPOSITIVE: The theory that the sun is the center of our solar system was proposed by Copernicus.

The underlined words rename and can take the place of the word theory.

NOTE: A noun clause functioning as an appositive takes the place of a single noun; therefore, it is not an appositive phrase. By definition, an appositive phrase is the appositive and its modifiers. Example: Your remark **that you hate school** surprises me. The underlined words are a noun clause, NOT an appositive phrase since there are no modifiers for the clause.

CHANGED

in 2024

#### **SECTION XI: PHRASES**

As a General Demand, a player can demand that the word to be formed must be contained in the following phrases, unless otherwise specified. (LT 16N).

**NOTE**: The number of times in a shake that a clause or phrase can be demanded depends on the division. In the **elementary division**, this Demand can only be made **once per shake**. In the **middle, junior and senior divisions** this Demand can only be made **twice per shake**.

1. APPOSITIVE PHRASE - An appositive phrase consists of an appositive and its modifiers. An appositive phrase usually follows the word it describes or identifies, but may precede it. #567

Examples: My brother's car, a sporty red hatchback with bucket seats, has over

100,000 miles on it.

Mr. Hudson, <u>a member of the jury</u>, asked the judge a question. Once a pagan feast, Valentine's Day is now celebrated as a day of

**NOTE**: An appositive preceded by a *possessive pronoun* or an *article* is considered to be a one-word appositive and not an appositive phrase.

Examples: The dancer, my <u>sister</u>, won the contest. (**Incorrect**)

My sister, the dancer, won the contest. (**Incorrect**)

(In both sentences, the appositives are considered one-word appositives.)

2. ADJECTIVE PHRASE\* - A prepositional phrase that is used as an adjective. See Prepositional Phrase below. #554

**Examples:** The ball in the yard is mine. (noun modifier)

Many of the tourists like historical places. (pronoun modifier)

3. ADVERB PHRASE\* - A prepositional phrase that is used as an adverb. #556 See Prepositional Phrase below.

**Examples:** She practices with diligence. (verb modifier)

She is smarter <u>than me</u>. (adjective modifier) He threw the bar far <u>to the left</u>. (adverb modifier)

4. INFINITIVE PHRASE\* - An infinitive phrase consists of an infinitive and any complements or modifiers it may have. An infinitive phrase can be used as a noun, adjective or adverb.

#565

**Examples:** We have time to walk to the concert. (adjective)

<u>To get a medical degree</u> is her goal. (noun – subject) They promised <u>to return soon.</u> (noun – direct object) The goal is to achieve happiness. (noun – predicate noun)

She had no desire except to stay home. (noun – obj. of preposition)

They studied to ace the test. (adverb – verb modifier)

He is eager to give Chris the award. (adverb – adjective modifier)
They work diligently to retire early. (adverb – adverb modifier)

**NOTE**: A simple infinitive is not an infinitive phrase.

**NOTE**: An infinitive that takes a subject is an **infinitive clause**, not an infinitive phrase.

<sup>\*</sup>Only for middle, junior, or senior divisions

5. **GERUND PHRASE\*\*** - A gerund phrase consists of a gerund and its complements and modifiers. The entire phrase is used as a noun. #563

**Examples:** Managing the restaurant efficiently required much hard work. (subj.)

My cousin enjoys <u>working as a lifeguard</u>. (direct object)
Please give <u>swimming in the ocean</u> a try. (indirect object)
Her greatest achievement was <u>winning three gold</u> medals.

(predicate noun)

We were fined for <u>parking there</u>. (object of preposition)

This year, I finally achieved my greatest joy, painting by the seashore.

(appositive)

6. PARTICIPIAL PHRASE\*\* - A participial phrase consists of a participle and its complements and modifiers. The entire phrase is used as an adjective and functions as either a noun modifier or a pronoun modifier. #559

Examples: Grinning broadly, the gymnast accepted the gold medal. (noun modifier)

Proclaiming his innocence, the candidate denied the charges. (noun modifier)

Puzzled by their behavior, I asked for an explanation. (pronoun modifier)

Zimbabwe, formerly known as Rhodesia, is in southern Africa.

(noun modifier)

**NOTE**: Participial phrases and gerund phrases are often demanded in the same sentence.

**Examples:** S-V-DO

Noun

Direct Object In a Gerund Phrase In a Participial Phrase

Considering walking the dogs, I tied my shoes.

("Considering walking the dogs" is a participial phrase modifying "I." "Walking the dogs" is a gerund phrase functioning as the direct object of considering.)

S-V-DO

Noun

Subject

In a Gerund Phrase

In a Participial Phrase

In a Noun Clause

Considering saying, "Happiness is everything," I quit my job.

("Considering ... everything" is the participial phrase modifying "I," "saying ... everything" is the gerund phrase functioning as the direct object of considering and "Happiness ... everything" is the noun clause (omitting the understood 'that') functioning as the direct object of *saying*.)

S-V-DO

Noun

Direct object

In a Gerund Phrase

In a Participial Phrase

Knowing making <u>candy</u> is my favorite pastime, the girl teased me.

("Knowing...pastime" is a participial phrase modifying "girl," "making candy" is a gerund phrase functioning as a direct object, and "candy" is the direct object of the gerund *making*.)

**PREPOSITIONAL PHRASE** (not a legal demand) - A phrase consisting of a group of words beginning with a preposition and ending with the object of the preposition (a noun, a pronoun, or a group of words functioning as a noun) and any modifiers of that object.

#554

**Examples:** The ball in the yard is mine. (noun modifier)

Many of the tourists like historical places. (pronoun modifier)

**NOTE:** It is possible for a phrase or clause that modifies the object of a preposition to be located directly after that object. In that instance, the words in that phrase or clause are considered to be part of the prepositional phrase.

Example: S-V Noun Direct Object In an Adverb Phrase

In an Adjective Clause

When my bicycle brakes failed, I crashed into the boy who was watching the game and his girlfriend.

(**Correct**. Since there is a compound object of the preposition, the adverb phrase consists of "into the boy ... and his girlfriend." However, the adjective clause "who was watching the game" modifies the object *boy*, so the words in the adjective clause are considered to be **in the adverb phrase**.)

**Example:** S-V-DO Noun Subject

In prepositional phrase (or adjective phrase)

In a noun clause

The girl near whoever said, "The dogs will run the race," will have to race.

(Correct. *Dogs* is the subject of the direct quote (a noun clause), functioning as the direct object of another noun clause "whoever...race." That noun clause functions as the object of the preposition *near*.)

**Example:** S-V Adverb Verb Modifier In adjective phrase

The sentence for the crime that he committed yesterday was suspended.

**Example:** S-V Adjective Noun modifier In adverb phrase In adjective phrase

We walked near the tree with the pink blossoms.

**NOTE:** Judges should look carefully at this usage to make sure the additional phrase or clause following the object of the preposition is functioning as a modifier of that object.

#### SOME SAMPLE SENTENCES WITH FUNCTIONS OF CLAUSES AND PHRASES:

### Whoever was thinking of calling the cat ours laughed.

S-V sentence pattern.

The word *ours* is a possessive case pronoun.

It is an \*\*objective complement in a gerund phrase. calling the cat ours

\*\*\*The gerund phrase is functioning as the object of a preposition. of

It is also in a noun clause \*\*\* functioning as the subject of the sentence. Whoever was thinking of calling the cat ours

### The man, who said that racing cars is a fun sport to watch, was yelling.

S-V sentence pattern.

- \*The word *racing* is a gerund used as a subject in a gerund phrase.
- \*\*\*The gerund phrase is functioning as a subject. racing cars
- \*\*The gerund phrase is in an indirect quote. that racing cars is a fun sport to watch
- \*\*\*The indirect quote is a noun clause functioning as a direct object in an adjective clause. **who** said that racing cars is a fun sport to watch
- \*\*\*The adjective clause is a noun modifier that describes *man*.

### Jim, wanting him to think, "The birds along the bubbling stream are loud," is a navigator.

S-LV-PN sentence pattern.

The word *along* is a preposition that is an introductory word in an adjective phrase \*\*\*functioning as a noun modifier.

It is in a direct quote that is also a noun clause. "The birds along the bubbling stream are loud,"

\*\*\*The direct quote is a noun clause functioning as a direct object of the infinitive "to think"

It is in an infinitive clause \*\*\*functioning as a direct object to think, "The birds along the bubbling stream are loud"

It is in a participial phrase "wanting him to think....are loud"

Note: Only players in the Senior Division may demand a function for a phrase or clause.

### SECTION XII: NOT CONTAINED IN CLAUSE OR PHRASE\*\*

In the Junior & Senior Divisions, players may demand that the word to be formed Not be Contained in any of the following Clauses or Phrases. (LT 16 Q).

(1)	adjective clause	(8)	infinitive phrase
(2)	adverb clause	(9)	gerund phrase
(3)	noun clause	(10)	participial phrase
(4)	infinitive clause	(11)	appositive phrase
(5)	elliptical clause *	(12)	adjective phrase
(6)	direct quote	(13)	adverb phrase
(7)	indirect quote		

<sup>\*</sup>elliptical clause does not appear on this list on the Junior Division Order of Play sheet

**NOTE**: The number of times this Demand, known as the "Must NOT Be Contained In ...." Demand, can be used is limited to <u>once</u>. Therefore, in combination with LT 16 M & N in the Junior & Senior Divisions, it is possible to demand that a word be contained in <u>two</u> clauses or phrases and not be contained in <u>one</u> other.

**NOTE**: If a player demands that a word must be contained in a certain clause or phrase and another player demands that the word must NOT be contained in the same clause or phrase, then the appropriate Challenge is Challenge Impossible.

### **SECTION XIII: DIRECT & INDIRECT QUOTES**

As a General Demand, a junior or senior division player can demand that the word to be formed must be contained in a direct quote and/or an indirect quote. (LT 16 O) #859

**A. DIRECT QUOTE\*\*** - A direct quote is a restatement of a speaker's exact words.

**NOTE**: Direct quotes must be correctly punctuated and capitalized. A direct quote functions as a noun.

**NOTE**: For the purpose of the game, a direct quotation must have an attributive statement such as, *He said*, "..."

**Example**: acceptable - He said, "I put the cows in the barn." [direct object] unacceptable - "I put the cows in the barn."

**NOTE**: An inverted sentence will result if the player begins the sentence with a direct quote and then follows with the verb and the speaker.

"Strike three," yelled the umpire.

**NOTE**: For the purpose of the game, if *direct quote* is demanded, the direct quote needs to be written as a complete thought with a subject and a verb and function as a noun clause.

**B. INDIRECT QUOTE\*\* -** An indirect quote is a statement that does not give the speaker's exact words but does convey the speaker's message. It does not use quotation marks.

Example: Mother said that she was listening to country music.

[A direct quote would be Mother said, "I am listening to country music."]

**NOTE**: An indirect quote functions as a noun.

Examples: He said that the box was empty. [direct object]

That the box was empty was all he could say. [subject]

My remark was that the bill is a menace. [predicate noun]

Your remark, that the bill is a menace, has aroused vigorous protest.

[appositive]

**NOTE**: A direct or indirect quote is considered a subordinate clause if it contains a subject and a verb.

**Examples:** He said, "I went to the store." (**correct –** direct quote in a complex sentence) He said that he went to the store. (**correct** – indirect quote in a complex sentence)

If the quote consists of a single word, other than an imperative verb, this would not be true.

**Example:** He said, "No." (incorrect – This is not a complex sentence.)

#### SECTION XIV: ADDITIONAL GENERAL DEMANDS

In addition to the General Demands listed above, the following General Demands may be called. Each demand is restricted to only one use in a shake. (LT 16)

- **A. COLOR WILD:** A color is wild in this shake. In the word to be formed, cubes of this color may represent a single letter more than once, or it may represent different letters. For instance, one wild cube may stand for "G" and another wild cube for "E" in the same shake. Only <u>one</u> color may be wild in a Shake.
- **B. MUST CONTAIN:** The word must contain a certain letter designated by the player making the Demand. Only one letter may be demanded in a shake.
- C. MUST NOT CONTAIN: The word may not contain the letter designated by the player making the Demand. Only one letter may be forbidden in a shake.
- D. LETTER TRANSFER: All occurrences of a letter designated by the player making this Demand become the other letter specified by the player making this Demand. For instance, "All P's are X's." In this case, "P's are entirely eliminated from the shake. Even a wild cube designated as a "P" becomes an "X." Only one letter transfer is allowed in a shake.
- E. NUMBER OF LETTERS: The word must contain the exact number of letters designated by the player making this Demand. No less than four and no more than ten letters may be demanded.
- **F. DOUBLE VOWEL:** The word must contain a double vowel. This means the word must contain two consecutive vowels of the same letter, for example, *ee*, *oo*, *aa*.
- **G. DOUBLE CONSONANT:** The word must contain a double consonant. This means the word must contain two consecutive consonants of the same letter, for example: *tt*, *pp*.
- O. COMPOUND WORD: A compound word is one word formed by combining two or more smaller words. The compound word retains in some form the combined meanings of the smaller words.

  NOTE: In an open compound, or two-word compound, such as "light bulb," the

word "light" will be ruled as a noun used as an adjective.

### **SECTION XV: SOLUTIONS**

After a Challenge has been made, players have three minutes to write solutions followed by two minutes to check solutions. (LT 13). A solution consists of a written sentence that is of the pattern, structure, or purpose designated by Player One and contains a word that satisfies all of the Demands made of it.

**NOTE**: If the player writing the solution is making a Demand as his last move, this last Demand must also be written beside the solution. (**LT 21**).

**NOTE**: A solution shall be considered to be presented when a player directly hands his solution to another player thereby indicating that this is his solution. Once the solution is in the hands of another player, it cannot be withdrawn. Allowing the time to run out when checking an opponent's solution implies acceptance of the solution.

### A. Requirements of Word to be Formed (LT22)

In addition, the word that is formed must conform to the following specifications:

- 1. It may not be a contraction, a hyphenated word, or a proper noun. It may not contain an apostrophe. It may not contain a diacritical mark.
- 2. It may not be labeled obsolete in the official dictionary. (*archaic* is acceptable)
- 3. It must be listed with a definition in the official dictionary.

**NOTE**: The word to be formed by the student must be contained in the official dictionary, *Webster's Third International Unabridged*. During competition the current *Online Unabridged* version at <u>dictionary.eb.com</u> is referenced. (**LT 4**) If the word is not in the dictionary, all inquiry stops.

- 4. It may not be a word that is profanity, vulgar, or slang in its usage.
- 5. It may not be an abbreviated version of the word.
- 6. It must be used accurately according to its definition in the official dictionary, that is the final authority.

NOTE: The dictionary may list the word with var of (variant of) next to it along with an alternate spelling. Judges should look up the alternate word as it will have the same meaning.

**NOTE**: While players can ask a judge to check the official dictionary for spelling and usage, the players should never be shown the dictionary during the round. Instead, a player's question should be answered specifically (i.e., "Yes, the word is spelled correctly.")

- 7. It must be used in the sentence in the way it is normally used. A word cannot be called an adjective simply because the player wishes to use it in that manner. Again, the official dictionary is the final authority on whether a word may be used as the demanded part of speech.
- 8. It must not be contained in a title.

### B. Requirements of Sentence to be Written:

The sentence to be formed must conform to the following specifications:

CHANGED in 2025

1. It must be able, in the opinion of the judges, to be justified as reality. Players cannot add statements such as "in my dream," "in the story," "in the movie," etc. to justify reality. The reality of the situation should be provided in context of the sentence. The sentence will be viewed as presented by the player. There should be no need for any verbal clarification by the player.

### Examples for S-V, adjective, noun modifier, double vowel, 5 letters:

The <u>green</u> teapot broke. (acceptable) The <u>green</u> teapot danced. (unacceptable)

2. It must be grammatically correct, including subject-verb agreement. A grammar book may be needed to determine correctness. If two grammar books disagree, the judging team will be the final authority.

**NOTE**: The official grammar reference is *Elements of Language*, 6th Course published by Holt Rinehart Winston. *Elements of Language* shall be considered the primary reference with the following two references serving as secondary sources to expand upon *Elements* or when *Elements* does not address an issue. These are: (i) Prentice-Hall Grammar and Composition, Levels 1-6 and (ii) the Plain English Handbook. (**LT 4**).

- 3. It must have all words spelled correctly and utilize proper capitalization.
- 4. It must begin with a capital letter and close with the proper punctuation.
- 5. All words used in the sentence must be properly punctuated. This includes possessive nouns and words that require diacritical marks (according to the official dictionary), ex. fiancée, jalapeño.
- 6. Internal punctuation will apply only to possessives, interjections, appositives, nouns of direct address, conjunctive adverbs, and direct quotes.
- 7. It must not be, in the opinion of the judges, unintelligible or cumbersome.

**NOTE**: Cumbersome must be judged in context. A sentence is not cumbersome simply because it could have been written better or more simply. For example, if the players have demanded two clauses or phrases, cumbersome should be judged in light of this requirement.

8. The sentence to be formed may not exceed 20 words in length.

### **SECTION XVI: JUDGING**

#### A. HOW WILL I KNOW WHEN A JUDGE IS NEEDED?

Usually there are few calls for judges during the opening moments of the game. It is not until the round is just about over that you will be called into action. Players signal for a judge by raising their hands. Players are not to get out of their seats to go in search of a judge.

### B. WHAT DO I DO WHEN I GET THERE?

First, make sure that a Challenge has been made and that you are not verifying a solution prior to a Challenge. Then listen carefully to the specific question. Have the player clarify a question if necessary. Before making a judgment read the Demands and the solutions. When you are ready, answer the question with a simple YES or NO. Avoid teaching explanations. Avoid answering questions that were not asked. For example, if a player asks, "Is this a direct object?" respond with a YES or NO. **Do not add**, "No, it is a predicate nominative." **Do not respond with**, "Yes, but it is misspelled."

**NOTE:** It is important to read the Demands so that irrelevant questions do not affect the play and, ultimately, the score. For example, a player may ask, "Is this word (not the solution word) plural?" The answer may be NO but that is irrelevant to the Demands.

Or a player may ask, "Is this word (the solution word) the subject of the sentence?" Not looking at the Demands can lead to the judge misleading the players. For example, assume that the word is not the subject of the sentence, but is a subject of a dependent clause. Therefore, while the answer to the player's question is NO, if the Function Demand was SUBJECT, it is irrelevant if the solution word is a subject of an independent or dependent clause. In such cases, a judge should say, NO, BUT THAT QUESTION IS IRRELEVANT AND SHOULD NOT AFFECT THE CORRECTNESS OR INCORRECTNESS OF THE SOLUTION.

In LinguiSHTIK, the players ask specific questions, and the judges answer the question asked, nothing else. However, this rule must be tempered with the reality that judges cannot allow themselves to be pawns in one player's attempt to deceive another. If a player asks an irrelevant question, in answering, the judge is allowed to tell the players that the question is irrelevant and should not affect the correctness or incorrectness of the solution.

Once you have answered the question, the player may pose several other questions. Contrary to the myth that only three questions are allowed to be asked by a player, there is no set limit on the number of questions a player can ask. Each judge has to use his judgment as to when a particular player is "fishing" or attempting to waste time. Should you begin to feel that the student is "fishing" for something or is having you do his job for him, you may exercise your prerogative and ask him to make a statement of what he thinks is incorrect about the sentence. Usually this is enough to return his focus to the game.

### C. WHAT DO I DO WITH THE MIND-BOGGLING QUESTION?

In LinguiSHTIK, time is of the essence. A match only lasts thirty minutes; therefore, every minute a judge is at a table is a minute the players cannot play. Judges should remember this at all times. Many questions can be answered by a judge quickly. However, there are those questions that take additional time and that you may like to have help in resolving. If this occurs, confirm that the players have finished checking solutions except for the questions they have posed.

**NOTE**: Here, you must be careful. You want to make sure that when you take the questions away from the table that the shake is otherwise complete. (This avoids your coming back in ten minutes with a ruling and having the players say that they have other questions about the solution.) But, when confirming that the players have completed the shake, a judge must be careful not to volunteer any information. For example, it is improper for a judge to remind players that they should check that the solution word can be formed with the available cubes.

Once you have confirmed that the shake is otherwise over, confirm with the players the questions to be resolved. In a perfect world you would have each player write down all unanswered questions about the solution, and have all players check the questions and verify their correctness. But, remembering the students only have thirty minutes to play a match, the judge should note the questions to be asked and simply confirm with the players that those are the only questions. Make sure you keep the original solution(s) upon which the questions are being asked. Then, instruct the players to begin another shake. Tell players to hold their score and remain in the playing room until you return to answer the question and resolve the score.

As quickly as possible, discuss the solution with other judges. As soon as the question is resolved, inform the players of the official ruling so they can score the shake and determine a final score for the match. If a decision is made after score sheets have been turned in, give the score sheet to the division coordinator to take to the scoring room.

#### D. HOW MANY JUDGES MAY A PLAYER HAVE?

Often, a player will receive an unfavorable ruling and want a second opinion. Usually, another judge can be called to the table. Have the player who posed the question restate the question for the second judge. Most of the time the two judges will concur, and play can be continued; however, a conference may be needed to reach agreement. (Of course, any such conference should take place after the players are instructed to begin another shake using the procedure outlined above for mind-boggling questions). Remarkably, the fact that a group of judges has reviewed a question will normally satisfy the player.

If the two judges agree, the decision stands; the player may seek no other judges during the round, but still has the opportunity to appeal the decision in writing following the round (see below).

If the two judges disagree, they should seek a ruling from a third judge. After hearing from three judges, the player may still make a formal appeal. The player who wishes to appeal must be careful to preserve all materials and other papers on which facts pertinent to the disagreement are recorded.

If a judge encounters a player that wants to **appeal**, the judge should immediately do the following:

- > collect all solutions and all questions relating to that shake
- > advise the players to continue the match
- immediately notify the division coordinator of the potential protest
- inform the players that at the conclusion of the match a player who wishes to protest should fill out a protest form and should not sign the scoresheet
- > turn over all solutions and questions along with the scoresheet, protest form, and List of Demands Form to the division coordinator.

None of the players involved in the protest should leave the playing area until instructed to do so by the division coordinator.

**NOTE:** a player may appeal only if two judges agree on a ruling and the player disagrees. Any player who believes he has received an incorrect ruling should not sign the scoresheet. Appeals and/or Protests must be filed according to the Appeals Rules in place for that Tournament.)

### E. WHAT DO I DO IF I REALIZE THAT I MADE A MISTAKE?

If a judge realizes during the match that he has made a mistake, the judge should inform the division coordinator and the players involved. The division coordinator will change the score for that shake accordingly.

### F. JUDGING: GENERAL INFORMATION AND GUIDELINES

- 1. Always insist that players ask questions to which you can give "yes" or "no" answers.
- 2. Always be sure that Challenges have been made and/or solutions presented before answering substantive questions.
- 3. Only questions on timing and procedural issues should be answered during a shake.
- 4. Never offer any information about a solution unless it is in response to the specific question asked.
- 5. Never explain something to a player during the course of a round.
- 6. Never allow yourself to become a pawn in a player's "fishing" expedition.
- 7. Remember, time is of the essence. If it will take you more than a couple of minutes to render a decision, have the players start another shake. They can score the shake under consideration later in the round.
- 8. When a judge is called to the table, the timer should be laid down while you learn the situation and make a ruling.
- 9. When players give conflicting testimony, Was a ten-second warning given? Did the cube touch the mat? Was the cube in Letters or Demands? etc. . . . the rule of thumb is not to penalize a player unless the evidence is definite. In a three-player game, if two of the three players agree on a situation, you can follow the majority opinion; however, if the third player does not know or refuses to take a stand on the issue, you will be at a real loss in settling the problem. The same will be true if a controversy erupts in a two-player game. In these cases, a shake may need to be replayed or a move made over. (Never have players replay a shake without consulting the division coordinator).
- 10. Never judge a move to be an Illegal Procedure if the player has selected something that is from the correct category. Frequently something may appear to be impossible; however, this does not make it an Illegal Procedure.
- 11. Always allow a player to have all of the judges' opinions to which he is entitled.

### SECTION XVII: TECHNICAL RULINGS

# A. MOVING (includes making Demands, Illegal Procedure, and Duplicate Demands)

1. SITUATION: A player moved out of turn and Illegal Procedure is charged.

RULING: Return the cube to Resources and continue play in the proper order.

PENALTY: None unless the play is not completed during the player's time.

2. SITUATION: A player moves out of turn and a Challenge is called before Illegal

Procedure is charged.

RULING: The Challenge insulates the Illegal Procedure; therefore, the Challenge

stands and is worked out in the usual way.

PENALTY: None

3. SITUATION: A player moves out of turn and a Challenge is called and an Illegal

Procedure is charged simultaneously.

RULING: The Challenge prevails. Set aside the Illegal Procedure charge and work

out the Challenge in the usual way.

PENALTY: None

4. SITUATION: A player moves out of turn and no Illegal Procedure is charged or

Challenge is called. Another player, other than the one whose turn had

been skipped, moves. Illegal Procedure is charged.

RULING: All cubes played by the last two Movers are returned to Resources and

play resumes with the player whose turn it should have been.

PENALTY: None

NOTE: If players have been moving in the wrong order (e.g., counter-clockwise instead of clockwise) for

several moves, a judge should simply tell them to start moving in the right order from that point on and leaving all previous moves as played. In some situations, players may prefer to complete

the shake moving counter-clockwise.

5. SITUATION: After moving a cube to one section of the playing mat, the Mover attempts

to transfer the cube to another section. Illegal Procedure is charged.

RULING: Illegal Procedure; the cube must stay in the section where it first touched

the mat. If it is a green or black cube and first touched the Demands

Section, then the player must make a Demand. Play continues.

PENALTY: None unless the play is not completed during the player's time.

6. SITUATION: So many cubes have been played to the Letters section of the mat that they

fill the area. The next player moves a cube to that section and places it on top of another cube in that section. He then tries to change his move,

arguing that his first cube never "touched the mat."

RULING: Changing the move is an Illegal Procedure. The play was completed when

the cube touched the other cube(s) that sat on the mat. Play continues.

PENALTY: None unless the play is not completed during the player's time.

7. SITUATION: Player One makes a Demand without putting a cube into the Demands

Section or writing it on the List of Demands Form. Another player moves correctly making a Demand before it is noticed that Player One did not

finish his move.

RULING: Player One's Demand is not in place since no cube was played to the mat.

The second player's Demand stands since it was made correctly by

placing a cube to the mat and writing the Demand on the List of Demands

Form.

PENALTY: None. Even if all the players have written Player One's Demand on their

own papers, it is not a legal Demand if a cube was not played to the mat.

8. SITUATION: A player makes a Demand without moving a cube into the Demand

Section of the mat, and no one has noticed nor was Illegal Procedure charged. After several more legal Demands are made, a player attempts to make a Demand using the last green or black cube. (This is the cube that

should have been used for the Demand made without a cube.)

RULING: Illegal Procedure; a shake can have no more than eight (8) Demands even

if there is an extra cube due to a previous Illegal Procedure. In this instance, the Demand that was stated without a cube being played to the mat is not in play and should not be a requirement of the solution being written (even if it was written on the List of Demands Form and/or the

players' own papers).

PENALTY: None unless the play is not completed during the player's time.

**NOTE:** Players should NOT use the challenge block to charge an Illegal Procedure or Duplicate Demand. In addition to the Situations listed here, judges should refer to the details of how each is handled, time limits and penalties on pages 6-7 of Section I.

9. SITUATION: A player makes a Duplicate Demand (example: calling pink wild when

yellow wild had already been called) and Illegal Procedure is not charged.

Another legal Demand is made. Challenge Impossible is called.

RULING: The Challenge stands. The Duplicate Demand is set aside, and any

solutions are written without it.

PENALTY: None. (The person making the Duplicate Demand will be indirectly

penalized since his demand has been set aside. The person who made the legal Demand may be able to write a solution, but that player should have charged Duplicate Demand when the Duplicate Demand was made.)

Follow Challenge-Scoring Rules

10. SITUATION: A player makes a Duplicate Demand (ex. calling a third phrase or clause

in the Middle Division), and another legal move is made before Illegal

Procedure is charged.

RULING: The Duplicate Demand charge cannot be honored. Duplicate Demand can

only be charged on the immediate play. The legal move has insulated the Duplicate Demand. However, any solution that is written will <u>not</u> include

the duplicate demand.

PENALTY: None. A penalty may only be used if the Duplicate Demand is charged on

the immediate play.

11. SITUATION: A player makes a Duplicate Demand by placing a cube on the Demands

section of the mat, stating the Demand, and writing it on the List of

Demands Form. Another player charges Duplicate Demand.

RULING: The player who made the Demand gets a -1. The Demand is set aside, and

the player uses his time to make a legal move. If he does not complete it within the time limit, he loses his turn. The Duplicate Demand is not in

effect and any solutions are written without it.

PENALTY: The player who made the Duplicate Demand gets a -1.

12. SITUATION: A player makes an illegal Demand (ex. calling *plural* when *Noun Used as* 

Adjective has been demanded as the function for a Noun) Illegal Procedure

is charged before the next player moves.

RULING: The player retracts his Demand and makes a legal move. The time should

be reset to the amount of time he had left to make his move.

PENALTY: None, unless the play is not completed during the player's time.

13. SITUATION: A player states or writes a Demand but has not yet placed a cube in the

Demands section of the mat. He decides to withdraw the Demand.

RULING: The Demand is retracted. (Since a cube had not been played to the mat, the

Demand was not yet in force.)

PENALTY: None, unless the player does not complete a move during his time.

14. SITUATION: A player makes two Demands/moves in a row and Illegal Procedure is

charged before another player moves.

RULING: The player's second Demand/move is removed.

PENALTY: None unless the play is not completed during the player's time.

15. SITUATION: A player makes two Demands/moves in a row and a Challenge is called

before another player moves.

RULING: The second Demand stays (as long as it is a legal demand), and the

Challenge stands.

PENALTY: None. Follow Challenge-Scoring Rule

16. SITUATION: A player makes two Demands/moves in a row and another player has

moved before Illegal Procedure is called.

RULING: Illegal Procedure cannot be called. This call must be made at the time the

play is made. The player's second Demand remains.

PENALTY: None

17. SITUATION: A player states his Demand but has not yet placed the cube in the Demand

column when a Challenge is called.

RULING: The Challenge stands, but the Demand cube has not touched the mat, so it

is not in play. The Challenge continues in the normal fashion unless the

challenger has challenged himself.

PENALTY: None unless the challenger was the last mover. Then the challenger would

get a -1 for an improper Challenge.

**NOTE**: The placing of the cube into the Demand column and the stating of a Demand are to occur <u>simultaneously</u>; however, **the Demand is not in play until the cube touches the mat.** The player making the Demand should write that Demand on the List of Demands Form in a timely manner once he has placed the cube into the Demands column.

18. SITUATION: A player has stated an illegal Demand but has not yet placed the cube into

the Demand column or written the Demand on the List of Demands Form

when a Challenge is called.

RULING: The Challenge stands. The Demand is not considered because the cube has

not touched the mat. The Challenge continues in the normal fashion unless

the challenger has challenged himself.

PENALTY: None unless the challenger was the last mover. Then the challenger would

get a -1 for an improper Challenge.

19. SITUATION: A player asks to have the cubes moved so that he can see them more

clearly. May he move the cubes?

RULING: Yes, the cubes may be adjusted so that all see them clearly.

20. SITUATION: A player has placed a cube into the Demand column and stated his

Demand. He does not finish writing the Demand on the List of Demands

Form before his time or the 10-second countdown is completed.

RULING: The Demand stands. The player should finish writing the Demand on the

List of Demands Form in a timely manner.

PENALTY: None. See Note under LT 8.

### **B. CHALLENGES**

1. SITUATION: A player takes his turn and Challenges before the next player takes his

turn.

RULING: The Challenge is set aside.

PENALTY: This is an improper Challenge. The challenger gets a -1.

2. SITUATION: A player picks up the challenge block and says "Challenge," then before

stating the Challenge wishes to retract the Challenge.

RULING: A player who picks up the challenge block and does not make a valid

Challenge or says nothing is penalized one point and the Challenge is set

aside.

PENALTY: The player who said "Challenge" gets -1.

3. SITUATION: A Challenge and an Illegal Procedure are issued at the same time by two

different players.

RULING: The Challenge prevails. The Illegal Procedure is set aside unless the

challenger is the player who has just completed a move. (SEE #1)

PENALTY: None unless the challenger is the player who just completed a move, in

which case he would get a -1 for an improper Challenge.

4. SITUATION: A player commits an Illegal Procedure. An opponent charges Illegal

Procedure. The other player then challenges this opponent that he should

have challenged rather than called Illegal Procedure.

RULING: The Illegal Procedure takes precedence. An Illegal Procedure charge

cannot be challenged.

PENALTY: None

5. SITUATION: A player touches the challenge block and issues a Challenge. No one

notices until later that the player did not pick up the block.

RULING: The player's Illegal Procedure was insulated by a valid action by another

player, that would be player(s) working on solutions during the threeminutes, the presentation of solutions, or checking of solutions. The

Challenge stands as issued.

PENALTY: None

6. SITUATION: A player issues a Challenge but does not pick up the challenge block.

Illegal Procedure is called.

RULING: If the challenger does not pick up the challenge block, there is no

Challenge. The challenger must **pick up** the challenge block and reissue

the Challenge.

PENALTY: None unless the player does not complete his move during his time.

7. SITUATION: A player clearly challenges but does not pick up the challenge block.

Another player, noticing that the block was not picked up, picks it up and

institutes a Challenge.

RULING: The second Challenge prevails. If the first challenger does not pick up the

challenge block, there is no Challenge; therefore, the first Challenge is

ignored.

PENALTY: None. Follow the Challenge-Scoring Rule.

8. SITUATION: A player picks up the challenge block and challenges "A-Flub" or

"C-Flub."

RULING: These are old Equations and On-Sets Challenges and are not correct

terminology for LinguiSHTIK. If the opponent asks for a clarification of

the Challenge, the Challenger must rephrase the Challenge using

LinguiSHTIK terminology such as "Challenge Now." If necessary, the

judge should translate for the opponent.

PENALTY: None

9. SITUATION: A player calls Challenge Now when there are fewer than three cubes

placed on the LETTERS section of the mat.

RULING: The Challenge is invalid. The Challenge is set aside, and the game

continues.

PENALTY: The player loses his turn and receives a -1 penalty.

10. SITUATION: A player picks up the challenge block and says "Challenge" but does not

specify what kind (e.g., Now, Impossible).

RULING: It is not a valid Challenge. The Challenge is set aside, and the game

continues.

PENALTY: The player who made the Challenge is penalized -1.

## C. PASS and FORCEOUTS

**NOTE:** Forceout is only called after each player has said PASS. (PASS is usually called because a player feels that any cube moved will allow a solution to be written with one more cube). A player writing a solution after Forceout has been called may use **two more** cubes from Resources in writing his solution.

1. SITUATION: A player declares PASS for the second time in the same shake.

RULING: Illegal Procedure. Ignore the PASS call, and the player makes a move.

PENALTY: None unless the player does not complete his move during his time.

2. SITUATION: Two of the three players declare PASS consecutively. The third player

places a cube on the mat, either in Demands or Letters. One or both of the other players tell the third player that he must PASS so that Forceout can

be called.

RULING: The third player may choose to play a cube, make a Demand if there is

still a green or black cube in Resources, or state a Challenge. Play continues with Player One either playing a cube or making a Challenge.

PENALTY: None

3. SITUATION: Same as #2 except the third player calls either Challenge Now or

Challenge Impossible.

RULING: The Challenge stands. Work out the Challenge declaration in the usual

way.

PENALTY: Follow the Challenge-Scoring Rule.

4. SITUATION: A player calls a Forceout instead of declaring PASS.

RULING: Remind players that Forceout cannot be called unless each player has

called PASS. Set aside the Forceout declaration and instruct the player to

make a correct move.

PENALTY: Assuming that the player completes his turn within the time limit, there is

no penalty.

5. SITUATION: After each player has declared PASS and Forceout is called, the players

write solutions. One player insists that because there is a black or green cube in Resources, he was allowed to write his solution using a written

Demand as one of his two cubes.

RULING: The rules state that players may use two more cubes from Resources, but

that neither of those cubes may be used as a Demand. The player's

solution is incorrect. See LT 24, II.B.

PENALTY: Follow the Forceout Scoring Rule.

# **D. SOLUTIONS**

1. SITUATION: After presenting a solution, a player attempts to change it or add to it.

RULING: If the player has handed his solution to an opponent, then the solution

stands as presented, even if his time has not expired.

PENALTY: None

**NOTE**: Be aware! If the opponent <u>takes</u> the paper from the solution-writer, claiming the writer was finished, this does not mean the solution-writer has finished the solution.

2. SITUATION: At the end of the three-minute solution writing time, a player has not yet

finished his solution and wishes to take a one-point penalty to gain an

additional minute of writing time.

RULING: The player may not do this. LinguiSHTIK does not allow for this. The

Stalling Rule from the mathematics games does not apply. The player must either concede (in which case he is Neutral) or present his solution as

it is.

PENALTY: None

3. SITUATION: Players are checking solutions; player A accepts his opponent's solution;

however, player B finds an error and does not accept. Does player A's

acceptance stand, and he receives fewer points?

RULING: No, a solution must be accepted by both opponents before it is correct. If

either party finds an error, the solution is incorrect, and the shake is scored

accordingly.

PENALTY: None

**NOTE**: This same ruling applies to any situation where two players are checking the third player's solution.

4. SITUATION: Player A, after accepting an opponent's solution as correct, notices and

points out an error in the solution. Player B then rejects the solution for

this reason. Is this acceptable?

RULING: Yes, the solution-writer was incorrect, and the shake is scored

accordingly. The player who at first accepted the solution still scores 4 or

2 points.

PENALTY: None

5. SITUATION: The solution-writer made an additional Demand as his one more cube in a

Challenge Now situation, but he did not write down the Demand on his

solution paper. Is the solution acceptable?

RULING: No, the rule that allows for this move (LT 19 A) requires the Demand be

written on the solution paper. The solution is incorrect.

PENALTY: The solution is incorrect and is scored accordingly.

6. SITUATION: The solution-writer made an additional Demand as his *one more cube*.

wrote the Demand with his solution, but there was no green or black cube

left in Resources with which to make the Demand.

RULING: The solution is unacceptable. There must be a remaining Demand cube in

Resources in order to do this.

PENALTY: The solution is incorrect and is scored accordingly.

7. SITUATION: Player A presents a solution based upon the Demands that are written on

his paper. In checking the solutions, one of his opponents Player B rejects

the solution because it does not meet the Demands that were made

according to those written on the List of Demands Form. Player C agrees

with Player B.

RULING: The *List of Demands Form* is a primary resource used by judges when

answering questions about each shake. If all players agree that a Demand was in force for the shake, even if not written on the *List of Demands Form*, then the Demand is in force. If there is not unanimous agreement, however, then what is written on the *List of Demands Form* becomes the

authority. (LT8)

PENALTY: Players are cautioned to make sure each person records his/her Demands

correctly on the List of Demands Form and on individual papers. Follow

the Challenge-Scoring Rule.

8. SITUATION: Player A presents a solution based upon the Demands that are written on

his paper. In checking the solutions, both of his opponents have the same Demands written on their individual papers. Player B questions if Player A's solution can be correct because it does not meet the Demands that

were written on the List of Demands Form.

RULING: See #7 above.

PENALTY: None

9. SITUATION: Same as #7 except there are only two players who disagree about what the

Demands were for that shake. Once again, the List of Demands Form is

the only source for what was demanded.

RULING: Only a correct solution that matches the List of Demands Form is

acceptable since there is no unanimous agreement about the Demands

made during that shake.

10. SITUATION: Players present solutions. Each player has different Demands on his/her

paper; no one has recorded any Demands on the List of Demands Form; and after inquiry it cannot be determined which are the correct Demands.

RULING: Throw out that shake. If the players request additional time at the end of

the round for this extra shake, it is to be given. Notify the division

coordinator.

PENALTY: None

**NOTE**: In situations #7-10, players should be cautioned to be extremely careful in making Demands.

They should check to see that the player stating the Demand records it correctly on the List of Demands Form and that each player does so on his/her individual papers. This is particularly true when the Demands involve letters.

11. SITUATION: A player rejects a player's solution because he has printed in all capitals.

The solution's capitalization is quite clear.

RULING: LT 23C will be interpreted to mean correct capitalization, not correct

formation of letters. If the letters that should be capitalized are clearly larger than the other letters in the solution, then the solution should be

accepted if it meets all other Demands and requirements.

PENALTY: None

**NOTE**: For the purposes of this game **LT 23C** will be interpreted to mean correct capitalization and not the correct formation of letters. Judgments should favor the writer when possible since a player rejecting on the basis of handwriting obviously can find no other grammatical error.

12. SITUATION: A player rejects a player's solution because he cannot read the

handwriting, either he claims word is misspelled or he simply cannot read

it.

RULING: The judge should ask the player who has written the solution to either

spell the word or read the solution. When in doubt, rulings should be made in favor of the solution-writer rather than the opponent. The judge may also look at other examples of the solution-writer's handwriting to

determine similarities.

PENALTY: None

### SECTION XVIII: JUDGE'S SELF-TEST

### A. <u>Test Questions</u>

The following are sample questions that one might be called upon to answer in a tournament. Answer them and then check your answers with the answers at the end of this test. Feel free, if you so desire, to pull out the official grammar book or LinguiSHTIK Handbook and Judges Manual to check before you answer. You would be able to do this in a tournament setting. The answers and explanations are given at the end of this test. Remember; this is only a self-test.

NOTE: Asterisks indicate the division level for each question. \*only for middle, junior or senior divisions, \*\*only for junior or senior divisions, \*only for senior division. If you would like to take the actual LinguiSHTIK Judges Test to qualify to judge at the National Tournament, please contact the Language Arts Chairperson, Ellen Bredeweg at <a href="mailto:ebredeweg45@gmail.com">ebredeweg45@gmail.com</a> or <a href="mailto:ellenbredeweg@agloa.org">ellenbredeweg@agloa.org</a>.

- Section I: In this section the solution sentence is given first, and then the question is given below in italics.
  - 1. Please give this note to whomever answers the door. *Is whomever used correctly?*
  - 2. The stuffed monkey, my present, was wrapped in the Sunday funnies. *Is present in an appositive phrase?*
  - 3. I want to go fishing with Grandpa next Saturday. \* *Is this an S-V-DO sentence?*
  - 4. Jack said, "I like apples." \*

    Is this a complex sentence?
  - 5. Jimmy shot the deer as soon as it was close enough to his stand. *Is deer plural?*
  - 6. I enjoy listening to lectures more than working in the lab. \*\*\*

    Is working a direct object?
  - 7. The girl baked Martha a cake. *Is cake in an adverb clause?*
  - 8. The girls baked Mother a cake. *Is Mother a proper noun?*
  - 9. Ahem! You should eat your salad with your salad fork.\* *Is the interjection properly punctuated?*
  - 10. We expected the girls to win the race. \*\*

    Is girls in the objective case?

- 11. John said, "I can buy that bike because my brother lent me thirty dollars." \*

  \*\*Is brother in both a noun clause and an adverb clause?
- 12. One way to raise money is to have a bake sale. \* *Is this an S-LV-PN sentence?*
- 13. "I picked a bucket of strawberries," said Natasha. *Is this a simple sentence?*
- 14. We will borrow the car of my uncle who is eighty. \* *Is eighty in an adjective phrase?*
- 15. I expected John to choose the captain of the team. \* *Is captain in an infinitive phrase?*
- 16. Whoever passes the test will get a free day on Friday. *Is test in an adjective clause?*
- 17. Class, take out your math books. *Is class the subject of the sentence?*
- 18. Get quiet so I can hear the announcements. *Is announcements in an imperative sentence?*
- 19. Did you study for your Geography test? *Should geography be capitalized?*
- 20. The word occur is difficult to spell. *Is occur an appositive?*
- 21. The house where I was born is still standing. *Is born in an adjective clause?*
- 22. The boy, that one standing against the bleachers, is cute. \*\*\* *Is that a relative pronoun?*
- 23. I know where you live. *Is live in a noun clause?*
- 24. She sounds like she wants to come with us. \* *Is like a preposition?*
- 25. They were given a million dollars. \*\*\*

  Is <u>dollars</u> a retained direct object?
- 26. He put off the decision until a later date. *Is decision a direct object?*

- 27. He gave whoever wanted the papers that were stored in the warehouse a key. *Is warehouse in a noun clause?*
- 28. We listened to the music. *Is music a direct object?*
- 29. He handed the scissors case to Myron.

  Is scissors a noun used as adjective that is plural?
- 30. He yelled, "Joey!"

  Is this a complex sentence?
- 31. Help! I have fallen and cannot get up. \* *Is help an interjection?*
- 32. While considering running for class president, the student who had never been popular realized that he would not overcome his handicap. \*\*\*

  Is this an S-V sentence?
- While proofreading the manuscript to be published, the editor fell asleep. *Is manuscript to be published an infinitive clause?* \*\*\*
- 34. In the book, the purple cow gave purple milk. *Is this sentence based on reality?*
- 35. You go to the store. *Is this an imperative sentence?*
- 36. I went to the store yesterday! *Is this an exclamatory sentence?*
- 37. The boy cried, "Hooray!" *Is hooray an interjection?*
- 38. Buying a woman perfume is always a tricky venture. \*\* *Is woman an indirect object?*
- 39. We were given a chance to bid on the painting. *Is the verb in the simple past tense?*
- 40. John said that the doctor is a great man. \*\* *Is doctor contained in an indirect quote?*

41. The boy is handsome. *Is handsome a noun modifier?* 

42. Help me finish this project. \* *Is project a direct object?* 

SINGULAR

43. Gloria was elected president. \*\*\* *Is president a retained objective complement?* 

44. Comedy usually becomes more common during times of despair. *Is common a comparative adjective?* 

- 45. Considering refusing the appointment was unthinkable to most of his friends. \*\*

  \*Is refusing contained in a participial phrase?
- 46. We will buy the car, only you must agree to pay for the insurance. *Is this a compound sentence?*
- 47. While buying parts for his car, the boy remembered he needed an oil filter. \*\*\*

  Is parts contained in a participial phrase?
- 48. While buying parts for his car, the boy remembered he needed an oil filter. *Is filter contained in a noun clause?*

SECTION II: In this section you are given the list of Demands; you are to determine if the solution meets all of the Demands. The word that was formed to meet the Demands is underlined.

49. S-V-DO The president who signed the treaty, in NOUN an <u>effort</u> to make peace, kept a solemn APPOSITIVE expression.

50. SIMPLE The boy said, "Looking in the <u>window</u> NOUN gives me the creeps."

OBJ. of PREP

51. S-V-DO We expect the geese to chase the ducks. \*

NOUN
DIRECT OBJ.
PLURAL
NO "S"

52. **INVERTED** Consume you anger will, as it has **VERB** consumed others. SIMPLE FUTURE. 7 LETTERS S-V-DO 53. The audience applauded because the choir sang so well. **NOUN SUBJECT** SINGULAR 54. **COMPLEX** We expect the girls to win the <u>matches</u> since they are on a winning streak. \* NOUN DIRECT OBJ. IN INFIN. PHRASE **PLURAL** 55. S-V-DO Giving my mother the cake, I left the reception because I was not feeling well. \*\* NOUN

IND. OBJ.

NOT IN GER. PH.

# B. ANSWERS AND EXPLANATIONS

- 1. **NO** You should use "whoever." *Whoever answers the door* is a noun clause functioning as the object of the preposition. *Whoever* is the subject of the clause.
- 2. **NO** An appositive phrase consists of an appositive and its complements or modifiers. However, single determiners, possessive pronouns, and demonstrative pronouns do not change an appositive into an appositive phrase.
- 3. **YES** The infinitive phrase to go fishing with Grandpa next Saturday functions as a direct object.
- 4. **YES** Simply *I like apples* is not a noun clause or any kind of phrase that can function as a direct object; however, the addition of the quotation marks turns it into a noun clause. If this had been an indirect quote a *that* or an *understand that* would have preceded it. The quotation marks serve as the understood markings for the beginning of a noun clause.
- 5. **NO** Although *deer* is both the singular and plural form of this word, in this sentence, *deer* is used singularly. We know this because of the use of the singular pronoun *it*, that refers to the deer that was shot.
- 6. **YES** If the subject in this adverb clause had not been ellipsed, we could easily see that working is the object --I enjoy listening to lectures more than I enjoy working in the lab.
- 7. **NO** By definition, this is a simple sentence, that is an independent clause.
- 8. **YES** When relationship nouns are used in place of a name, that noun is considered a proper noun just as a name is. In order for it to be a common noun, it must be preceded by a determiner or a possessive pronoun. ("my mother").
- 9. **YES** An interjection can be punctuated in one of two ways. This is correct because the interjection has an exclamation point after it, and the following sentence begins with a capital letter.
- 10. **YES** Girls is the subject of the infinitive clause. The clause functions as the direct object of the sentence, and in that position the subject of an infinitive clause is in the objective case.
- 11. **YES** The direct quote is a noun clause. In addition, inside the noun clause is an adverb clause "because my brother lent me twenty dollars." Therefore, brother is in both a noun clause and an adverb clause.
- 12. **YES** The infinitive phrase to have a bake sale functions as a predicate noun.

- 13. **NO** The direct quote is a noun clause because it contains a subject and a verb. Since the sentence contains both an independent clause and a dependent clause, it is complex.
- 14. **YES** The object of the preposition is *uncle*. Clauses or phrases that modify the object of the preposition are considered in that prepositional phrase. The adjective clause *who is eighty* modifies *uncle*. Therefore, *eighty* is in the adjective phrase *of my uncle*.
- 15. **NO** *John to choose the captain of the team* is an infinitive clause not an infinitive phrase. If there is no infinitive phrase, the word *captain* cannot be in one.
- 16. **NO** Whoever passes the test is a noun clause that functions as the subject of the sentence, not an adjective clause.
- 17. **NO** You, understood, is the subject of the imperative sentence. *Class* is noun of direct address, not a subject.
- 18. **YES** Even though *announcements* is in a dependent clause that is declarative in nature, that clause is part of the imperative sentence. The independent clause dictates the purpose of the sentence, and since this independent clause is imperative, the entire sentence is imperative.
- 19. **NO** Names of subjects are only capitalized if they are followed by a number, unless it is the name of a language.
- 20. **NO** *Occur* is in apposition to word, but for the purposes of this game, this is not an acceptable appositive. An appositive, by definition, is a noun. Since *occur* does not appear in the dictionary as a noun, it cannot be an acceptable appositive.
- 21. **YES** Adjective clauses usually begin with relative pronouns, but they may also begin with relative adverbs. *Where* is one of those relative adverbs.
- 22. **NO** Relative pronouns are used to introduce subordinate clauses. In this sentence *that* is being used as an adjective to modify *one*.
- 23. **YES** Where you live is a noun clause introduced by a relative adverb. The clause functions as a direct object.
- 24. **NO** In this particular case *like* is a subordinate conjunction used to introduce the adjective clause *like she wants to come with us. Like* has a separate entry in the dictionary giving it the identification of conjunction. This clause is also functioning as a predicate adjective.
- 25. **YES** When a passive voice verb is used, if there are any complements, they will be retained objects. It is helpful if you write the sentence using an active voice verb to show how the object was retained. *He gave them a million dollars*. Since dollars is a direct object in the active voice sentence; when retained it becomes a retained direct object.

- 26. **YES** Decision is the direct object of the verb participle *put off*. Decision is that which directly receives the action of being *put off*. *Off*, in this sentence is a verb particle rather than a preposition. For more details on Verb Particles, see Section IV: Verbs, page 25..
- 27. **YES** The entire noun clause is *whoever wanted the papers that were stored in the warehouse*. This entire clause functions as the indirect object of the sentence. Not only is *warehouse* contained in a noun clause, but it is also contained within the adjective clause, *that were stored in the warehouse*.
- 28. **YES** The player has satisfied the Demand of direct object. He has utilized the verb particle "listen to;" therefore, music serves as a direct object, not an object of the preposition. For more details on Verb Particles, see Section IV: Verbs, page 25.
- 29. **NO** There is no such thing as a plural noun used as adjective since noun used as adjectives function as adjectives, and adjectives do not have number.
- 30. **NO** In order for a direct or indirect quote to be considered as a noun clause, it must contain a subject and a verb. This one-word quote has neither; therefore, it is not a clause.
- 31. **YES** Although *help* is a verb, the official dictionary states that it is often used interjectionally. In this sentence *help* is properly punctuated as an interjection.
- 32. **NO** The pattern for this sentence is S-V-DO, *student -- realized -- that he would not overcome his handicap* (functioning as the direct object). *While considering...president* is an elliptical clause and *who had never...popular* is an adjective clause. Neither of these clauses has any effect on the pattern.
- 33. **NO** *Manuscript* is the direct object of the verb *proofreading* in an elliptical clause, and *to be published* is an infinitive phrase functioning as an adjective modifying *manuscript*.
- 34. **NO** The rules for the game of LinguiSHTIK prohibit sentences that contain "in the book" or similar statements like "in my dream" or "in the movie." The sentence must be based on reality without clarifying statements.
- 35. **NO** In this unique situation the player's lack of internal punctuation has caused his downfall. Without the comma after *you*, the sentence is interpreted as a declarative sentence. Had the player set off *you* with a comma, the ruling would have been YES since *you* would clearly have been a noun of direct address.
- 36. **YES** Even though this sentence does not exactly show great emotion, it is acceptable as an exclamatory sentence since the player put an exclamation mark at the end. While this is a gimmick for some, it is better to allow this than to put ourselves in the position where players concoct grand explanations of the circumstances under which the sentence could have been exclamatory.

- 37. **NO** The dictionary lists *hooray* as a variant of *hurrah*, so it is listed as an interjection in the dictionary. According to usage, by definition an interjection can have no grammatical connection to the sentence. In this particular case, the word *hooray* is the direct object, therefore, having a grammatical connection. In addition, the interjection is not punctuated correctly according to the punctuation rules for interjections.
- 38. **YES** *Woman* is the indirect object of the gerund phrase buying... perfume. This gerund phrase is functioning as the subject of the sentence.
- 39. **YES** *Were given* is the passive voice of the simple past. If this sentence were transformed into active voice you would have *He gave us a chance*.
- 40. **YES** *Doctor* is contained in an indirect quote. By definition, an indirect quote is a statement that does not give the speaker's exact words but does convey the speaker's message. John's message is that the doctor is a great man.
- 41. YES In all divisions a predicate adjective is accepted as a noun modifier.
- 42. **YES** *Project* is the direct object of the bare infinitive, an infinitive where the *to* is omitted.
- 43. **YES** If one were to return this to its active voice form, it would be easily seen that *president* is an objective complement; therefore, in the transformation of the sentence into the passive voice, *president* was retained as an object.
- 44. **YES** The word *common* uses *more* as an identifier, making it comparative. It is a predicate adjective modifying *comedy*.
- 45. **NO** Refusing is a gerund that begins the gerund phrase *refusing the appointment*. This gerund phrase then functions as the direct object of the phrase *considering... the appointment* that functions as the subject of the sentence. Thus, this sentence contains a gerund phrase within a gerund phrase.
- 46. YES Only has a separate listing in the dictionary as a coordinating conjunction.
- 47. **NO** *Parts* is the direct object in this elliptical clause. It is an elliptical clause because *the boy was* is easily understood to be between *while* and *buying*.
- 48. **YES** He needed an oil filter is a noun clause that functions as the direct object for remembered. The introductory that has been omitted.
- 49. **NO** *Effort* is an object of the preposition *in*, it is not an appositive. In order for *effort* to be an appositive, the sentence would have to be written as follows:

  The president who signed the treaty, an <u>effort</u> to make peace, kept a solemn expression.

- 50. **NO** The solution is automatically wrong since it does not meet the first Demand of being in a simple sentence. Since the direct quote contains a subject and a verb, it is considered a dependent clause (noun clause), making the sentence complex.
- 51. **NO** This sentence is wrong for several reasons. First, the word formed contains an "s." Secondly, *geese* is not a direct object. It is the subject of the infinitive clause that functions as a direct object.
- 52. **YES** By definition, an inverted sentence has a subject that appears after the predicate or between the parts of a predicate. The subject *anger* appears between the parts of the predicate *will* and *consume*.
- 53. **NO** Once again, the writer of this solution is wrong right from the start. The sentence that he produced has the S-V pattern.
- 54. **NO** This solution is incorrect because *matches* is contained within an infinitive clause rather than an infinitive phrase. This infinitive clause, *the girls to win the matches*, functions as the direct object of *expect*.
- 55. **YES** *Mother* is the indirect object of the participle *giving*. The participal phrase modifies *I*, that functions as the subject of the clause.
